LIST OF EXPERTS

A Curriculum Workshop for Development of Curriculum on the Subject "Energy Conservation" was held on 22nd January, 2018 at NITTTR, Chandigarh. The following participated in the workshop:-

S. No.	Name, Designation and Official address
From Fi	eld/Industries/Institutions of Higher Learning
1.	Shri Jotinder Singh, Engineer-in-Chief(Retd.) Punjab State Power Corpn. Ltd.(PSPCL), Punjab
2.	Shri Punit Sharma, Asstt.General Manager, Electrical & Energy Management, Godrej Appliances Ltd. Mohali, Punjab
3.	Ms. Anu Singla, Associate Professor, Chitkara University, Rajpura, Punjab
4.	Shri Girish Kumar, UP New and Renewable Energy Development Authroity (UPNEDA), Lucknow, U.P.
5.	Sh. Lal Ji Patel, TBO/ CDC Officer, IRDT Kanpur, U.P.
6.	Shri Ravinder Kumar, Research Assistant, IRDT, Kanpur, U.P.
From N	ITTTR, Chandigarh
7.	Dr. AB Gupta, Professor & Head, Curriculum Development Centre, Coordinator

I J O B O P P O R T U N I T I E S

1. Small Scale Industries.

As Supervisor in Offset, Gravure, Flexo

and Screen Printing Establishments.

2. Self-Employment

06%

10%

As owner of a printing press as a whole,

Or

Owner of a specialised unit, such as,

- (i) Typesetting
- (ii) Process camera work for production of Negatives, positives, and colour separations
- (iii) Plate-making for offset printing process
- (iv) Binding and other finishing work

Or

Owner of a Screen Printing Unit.

3. Medium and Large Scale Industries

65%

Supervisor or Operator of sophisticated machines like phototypesetters, colour scanners, computerised cameras, multicolour offset printing machines and web-offset machines, etc. Marketing and Sales Executive of print products.

4. Other Avenues of Employment

19%

Print Production Executives in public sector undertakings, advertising agencies, financial institutions , publishers, technical institutions.

Note.

The figures indicate the average of employed technicians who pass out with a Diploma in Printing Technology.

II J O B A C T I V I T I E S

- 1. Type setting
 - 1.1 Hand composing and mechanical composition
 - 1.2 Phototypesetting including editing and page make-up.
 - 1.3 Desk-Top Publishing (DTP)
- 2. Reproduction Technology
 - 2.1 Process camera operation
 - 2.2 Processing the camera outputs.
 - 2.3 Line and half-tone photography

 - 2.4 Manual colour separation2.5 Electronic colour separation
- 3. Surface Preparation
 - 3.1 Preparing the surfaces for different printing processes
- 4. Press work
 - 4.1 Preparing printing machines of presswork
 - 4.2 Selection and use of substrates and ink
 - 4.3 Operation of printing machines
 - 4.4 Handling running-on problems
- 5. Binding and Finishing
 - 5.1 Warehousing functions
 - 5.2 Conversion of printed materials into finished jobs
 - 5.3 Other finishing operations
 - 5.4 Re-binding
- Supervision and Management
 - 6.1 Planning, supervising, managing resources and factors of production
 - 6.2 Advertising and marketing
 - 6.3 Exercising quality control

1. TYPESETTING

	ACTIVITY	KNOWLEDGE	SKILL
1.1	Hand composition and Mechanical Composition	 a) Types, type measurement, casting-off, typographic design b) Proof Correction c) Methods of typesetting, page make-up and imporition schemes d) Operation and maintenance of machines 	
1.2	Phototypesetting includi editing and page make-up		 p- a)Operation of keyboards in English and one/two required languages. b) Practice in setting types of different measures for text, tabular and display jobs, and correction of error in proofs at various stages. c) Page make-up.
	Desk Top Publishing	 a) Disk Operating System(DOS) b) Word Processing c) Page make up and graphic software d) Soft-fonts and down loading fonts e) Printers and their outputs f) Optical Character Reader (OCR) and table top Scanner 	a) Operation of keyboards in English and one/two required languages. Practice in setting types of different sizes and different measures for text, tabular, and display jobs, and correction of errors in proofs at various stages. Page make-up. b) Operation of different printers and scanners
	ACTIVITY	 KNOWLEDGE	SKILL
2.1	Process camera operation	a) Types of process cameras, accessories and illuminants b) Types of originals and their selection. c) Optical system d) Latent image theory	a) Handling and maintenance of process camer and illuminants b) Focussing and sizing of the copy. c) Making of line and half-tone negatives.
2.2	Processing the camera outputs	a) Types of films and chemicals b) Manual and automatic processing c) Systematic working	a) Preparation and handling of chemicalsb) Handlingc) Use of densitometers, etc.,
2.3	photography	a) Theory of half-tone a; b) Continuous tone originals c) Types of half tone screening b;) Making half-tone negatives and positives.) Setting screens.
2.4	Manual colour seperation	a) Colour theories, filters, a screen angles and illuminants) Handling and maintenace of process camers Focussing and sizing of the copy. Making half-tone negatives and positives.
		b) Colour separation methods b; c) Masking and colour correction) Making colour separation negatives, using cameras and positives by contact printer and enlarger.

2.5	Electronic Colour	a)	Input scanning	a)	Loading the originals, setting and operating the scanner.
	separation		Processing Output, and colour theories, filters screen angles.	b)	Processing the outputs
Sur	face Preparation				
	ACTIVITY	[[KNOWLEDGE		SKILL
3.1.	Preparing the surface fir printing		a) Types of printing surfaces b) Stripping c) Chemical used for surface preparation		a) Preparation of printing surfaces, e.g. block plates, screens etc. b) Imposition schemes and film planning c) Preparing different solution d) i. Practice in graining, coating, exposing, developing, etching, lacquering, etc. Practice in desensitising for storage of plates
			d) Image formation for diffe-		ii.Practice in gravure screen and cylinder preparation.
			rent printing processes		<pre>iii. Practice in prepartion of flexographic surface.</pre>
			e) finishing the Surface.		e) Practice in finishing operations
4.	Presswork				
	ACTIVITY	 	KNOWLEDGE		SKILL
4.1	Preparing printing machines for presswork		truction of printing machi b) Method of obtaining impres	nes sio and	a) Setting the various of the press for starting printing.n b) Fixing the printing surfaces.c) Positioning the image, setting up of impressior and correct ink supply, and colour mixing and matching.
4.2	Selection and use of Substractes and inks		A) Kinds, sizes and weights of substrates and type of ink Suitability of ink and substrates, etc.		a) Care in handling of paper and ink
4.3	Operation of printing Machines		a) types, functions and const ction of printing machinesb) Method of obtaining impresc) Various units of printing		a) Handling and controlling point of the machines. n
4.4	Handling running on problems		a) Mechines faults and printa faults and their remedies	bil	ity a) Rectification of machines faults

5. 1	Binding and Finishing					
	ACTIVITY		KNOWLEDGE			SKILL
5.1	Warechousing functions		Handling, storage and obinding materials Paper size and subdivisand binding materials.			Practice in pre-forwarding operations. Making calculation and counting materials
5.2	Conversion of printed material into finished job		Machines and equipments required, securing and wrapper Adhesives			Operation of binding machines, stitching sewing and perfect binding Preparation of adhesives
5.3	Other finishing operations	a)	Laminations, diffedecorations including blocking, edge decorations	gold	a)	Use of machines, equipment and tools for decoration and finishing.
5.4	Re-binding.	a)	Differnt reparing metho	i	ii. ii. iv. v.	Practice in pre-forwarding operations .making calculation and counting materials .Operation of binding machines, stitching, sewing and perfect bindingPreparation of adhesivesUse of machines, equipment and tools for decoration and finishing .Pulling to pieces, repairing demaged folios.
6.	Supervision and managemen	ıt				
			KNOWLEDGE			SKILL
6.1	Planning, supervising, managing resources and factors of production	b)	Human behaviour Related laws and theori of economics Technical knowledge of printing and production	Les		ommunication skills, leadership, innovation nterpreneurship.
6.2	Advertising and marketing		Market potential Casting adn estimating			
6.3	Exercing quality control	a)	Norms and standards of print materials			Assessing the quality of printed products Forecasting for finished jobs.
IV	Course Object	i,	<i>7</i> e s			
	At the end of the course,	the	e students should be abl	Le to		
4.01	Understand the physica printing processes, p materials.					
4.02	Understand the chemical materials and chemical processes.					
4.03	Select suitable material	s f	or a printing job			
4.04	Supervise and handle typesetting and composin			lectroni	.C	
4.05	Supervise and handle prin respect of	oce	ss photography and plate	e makin	g	
	Process photog		ny for letter press,	flexo	,	

13

Letterpress and flexo plate-making Retouching, stripping and layout. Offset plate-making Gravure plate-making Screen printing

- 4.06 Supervise electronic equipments photography.
- 4.07 Supervise, handle machine room operations connected with

Letterpress and flexo printing Offset printing Gravure printing Web-fed Press: Letterpress/ Offset. Screen printing.

4.08 Supervise, handle finisihing operations connected with

Book, magzine and publicity materials. Stationery items and other work.

- 4.09 Detect the faults in printing machines (preventive maintenance . minor repairs.)
- 4.10 Manage and control production, which involves.

Selecting the porecess and the methodology of production $% \left(1\right) =\left(1\right) \left($

Estimating and Costing.
Planning and Scheduling
Allocating work to sectional heads.
Directing and motivating workers to achive targets.
Maintaining production records.
Indenting materials required for the job.
Exercising control over production and quality.
Acting as a link between labour and management.
Ensuring safety of labour and plant.
rendering technical advice on choice of materials and processes.

4.11 Apply scientific method to problem solving situations in printing processes, machines and management.

The subjects identified in the previous section can be grouped into different curriuclum areas as follows.

- 1. Printing Science and Materials (Physics, Chemistry, Printing Science, Paper and ink).
- 2. Lettering, type design, typography and layout.
- 3. Typesetting, make-up imposition and proof reading.
- 4. Photographic reproduction technology (Process photography and materials, retouching, stripping and layout.
- 5. Letterpress and gravure platemaking (Letterpress, platemaking gravure and flexographic)

- 6. Lithographic platemaking
 7. Letterpress printing
 8. Lithographic printing (offset printing techniques)
- 9. Rotary letterpress and web off set (web offset and web letterpress printing techniques)
- 10. Gravure, flexographic and silk screen printing techniques.
- 11. Binding and finishing.
- 12. Engineering principles (Mechnical Engineering, Electrical Technology, Drawing, Electronics)
- 13. Printing Management (Estimating and Costing, Production Management, Industrial Management, Productivity Techniques, Material Management and Quality control.
- 14. Printing machinery maintenance.
- 15. Industrial training
- 16. Project work.

In addition to the foundation courses in the above areas each student will select one elective subject either in the area of printing technology or in printing machinery maintenance for an in- depth study.

DETAILED CONTENTS

1. PARTS OF SPEECH:

- a. Noun
- b. The pronoun : Kinds and Usage
- c. The adjective : Kinds and Degree
- d. Determiner : Articles
- e. The verb : Kinds
- f. The Adverb : Kinds, Degree and Usage
- g. Prepositions
- h. Conjunctions
- i. The Interjections
- j. Subject: Verb Agreement (Concord)

2. **VOCABULARY BUILDING**:

- a. Antonyms and Synonyms
- b. Homophones
- c. One word substitutions
- d. Idioms and Phrases
- e. Abbreviations

3. **Grammar**

a. Sentence & its types

16

- a. Tenses
- b. Punctuations
- c. Active and Passive voice
- d. Transformation of Sentences
- e Synthesis of Sentences
- f. Direct and Indirect Narrations

4. <u>DEVELOPMENT OF EXPRESSION (Composition)</u>:

- a. Paragraph Writing
- b. Essay Writing
- c. Proposal Writing
- d. Letter Writing (Formal, Informal, Business, official etc.)
- f. Report Writing
- g. Note Making
- h. News Making
- i. Application Writing
- j. Minute Writing
- k. Invitation Letter Writing

SECTION "B" (Hindi)

- 5— संज्ञा, सर्वनाम, विशेषण, किया विशेषण, वर्ण समास, संधि, अलंकार, रस, उपसर्ग प्रत्यय।
- 6— पत्र लेखन, निविदा संविदा, दर आमंत्रण (कोटेशन) अपील, स्वतन्त्र अभिव्यक्ति, प्रतिवेदन लेखन, प्रेस विज्ञप्ति।
- 7— वाक्य/वाक्यांश के लिए शब्द, पर्यायवाची या समानार्थी शब्द, विलोम शब्द, अनेकार्थी शब्द, शब्दयुग्म या समुच्चारित शब्द समूह, वाक्य शुद्धि (शुद्ध अशुद्ध वाक्य), मुहावरे एवं लोकोक्तियाँ।

1.2 APPLIED MATHEMATICS I(A) [Common to All Engineering Courses]

L T P 3 2/2 -

Rationale:

The study of mathematics is an important requirement for the understanding and development of any branch of engineering. The purpose of teaching mathematics to diploma engineering students is to impart them basic knowledge of mathematics which is needed for full understanding and study of engineering subjects.

_

DETAILED CONTENTS:

- 1. ALGEBRA-I: (10 Marks)
- 1.1 Series : AP and GP; Sum, nth term, Mean
- 1.2 Binomial theorem for positive, negative and fractional index (without proof). Application of Binomial theorem.
- 1.3 Determinants: Elementary properties of determinant of order 2 and 3, Multiplication system of algebraic equation, Consistency of equation, Crammer's rule
- 2. ALGEBRA-II: (10 Marks)
- 2.1 Vector algebra: Dot and Cross product, Scaler and vector triple product.
- 2.2 Complex number.

Complex numbers, Representation, Modulus and amplitud Demoivre theorem, its application in solving algebraic equations, Mod. function and its properties..

3. TRIGONOMETRY : (8 Marks)

18

- 3.1 Relation between sides and angles of a triangle: Statement of various formulae showing relation ship between sides and angle of a triangle.
- 3.2 Inverse circular functions : Simple case only
- 4. DIFFERENTIAL CALCULUS I : (12 Marks)
- 4.1 Functions, limits, continuity, functions and their graphs, range and domain, elementary methods of finding limits (right and left), elementary test for continuity and differentiability.
- 4.2 Methods of finding derivative, Function of a function, Logaritimic differentiation, Differentiation of implicit functions.
- 5. DIFFERENTIAL CALCULUS -II : (10 Marks)
- 5.1 Higher order derivatives, Leibnitz theorem.
- 5.2 Special functions (Exponential, Logarithmic, Inverse circular and function), Definition, Graphs, range and Domain and Derivations of each of these functions.
- 5.3 Application Finding Tangants, Normal, Points of Maxima/Minima, Increasing/Decreasing functions, Rate, Measure, velocity, Acceleration, Errors and approximation.

1.3 APPLIED PHYSICS-I

[Common to All Engineering Courses]

L T P 3 2/2 -

Rationale:

Engineering physics is a foundation Course. Its purpose is to develop proper understanding of physical phenomenon and scientific temper in the students. While teaching the subject, teachers should make maximum use of demonstrations to make the subject interesting to the students.

TOPIC WISE DISTRIBUTION OF PERIODS

Sl.No.	Topics	L	Т	Р
1.	Units & Dimensions	3	1	-
2.	Errors in Measurement	3	1	-
3.	Circular Motion	4	1	_
4.	Motion of Planets	4	1	_
5.	Dynamics of rigid body (Rotational Motion)	5	1	_
6.	Fluid Mechanics and Friction	4	1	_
7.	Friction	4	1	_
8.	Harmonic Motion	5	2	_
9.	Heat & Thermodynamics	6	4	_
10.	Acoustics	4	1	-
		42	1 /1	

DETAILED CONTENTS:

1. Units and Dimensions (4 Marks)

- S.I. Units & Dimensions of physical quantities, Dimensional formula and dimensional equation. Principle of homogenity of dimensions and applications of homogenity principle to:
 - i) Checking the correctness of physical equations,
 - ii) Deriving relations among various physical quantities,
- iii) Conversion of numerical values of physical quantities from one system of units into another. Limitations of dimensional analysis.

2. ERRORS AND MEASUREMENT (4 Marks)

Errors in measuremnts, accuracy and precision, random and

20

systematic errors, estimation of probable errors in the results of measurement (Combination of erros in addition, substraction, multiplication and powers). Significant figures, and order of accuracy in respect to instruments,

3. Circular Motion (5 Marks)

Central forces. Uniform Circular motion (Horizental and Vertical cases), angular velocity, angular acceleration and centripetal acceleration. Relationship between linear and angular velocity and acceleration. Centripetal and centrifugal forces. Practical applications of centripetal forces. Principle of centrifuge.

4. MOTION OF PLANETS AND SATELLITES : (5 Marks)

Gravitational force, Acceleration due to gravity and its variation w.r. to height and depth from earth, Kapler's Law, Escope and orbital velocity, Time period of satellite, Geostationary, Polar satellites (Concept Only)

5. Dynamics of Rigid Body (Rotational Motion) (6 Marks)

Rigid body, Rotational motion, Moment of inertia, Theorems (Perpendicular and Parallel axis) of moment of inertia (Statement). Expression of M.I. of regular bodies (Lamina, Sphere, Disc, Cylindercal), Concept of Radius of gyration, angular momentum, Conservation of angular momentum, Torque, Rotational kinetic energy. Rolling of sphere on the slant plane. Concept of Fly wheel.

6. Fluid Mechanics : (5 Marks)

Surface tension, Capillary action and determination of surface tension from capilary rise method, Equation of continuity (A1V1=A2V2), Bernoulli's theorem, and its application stream line and Turbulent flow, Reynold's number.

7. Friction : (4 Marks)

Introduction, Physical significance of friction, Advantage and disadvantage of friction and its role in every day life. Coefficients of static and dynamic friction and their measurements. viscosity, coeff. of viscosity, & its determination by stoke's method.

8. Harmonic Motion (6 Marks)

Periodic Motion, characterstics of simple harmonic motion; equation of S.H.M. and determination of velocity and acceleration. Graphical representation. Spring-mass system.

Simple pendulum. Derivation of its periodic time. Energy conservation in S.H.M.. Concept of phase, phase difference, Definition of free, forced, undamped and damped vibrations, Resonance and its sharpness, Q-factor.

9. Heat & Thermodynamics: (6 Marks)

Modes of heat transfer (Conduction, Convection and Radiation), coefficient of thermal conductivity Isothermal and adiabatic process. Zeroth First, Second Law of Thermodynamics and Carnot cycle, Heat Engine (Concept Only).

10. Acoustics (5 Marks) Definition of pitch, loudness, quality and intensity of sound waves. Echo, reverberation and reverberation time. Sabine's formula without Derivation. Control of reverberation time (problems on reverberation time). Accoustics of building defects and remedy.

1.4 GRAPHIC DESIGN & TYPOGRAPHY

Rationale:

Printing production is based on proper designing and typographic planning. Introduction of Graphic Design & Typography subject is essential to impart basic knowledge and skills in graphic design principles, layouts, typographic principles and methods etc. This subject is essential as prerequisite for studying printing Design and Letter Assembly subjects in the Diploma Curriculum.

- 1. Printed products,
- 1.1 Introduction to format and design factors for printed products, photography and illustrations.
- 1.2 Embellishment: Leaflets, pamphlets, Booklets, Folders, Catalogues, Brochures, Manuals, Books, Magazines and Newspapers, Business-forms and commercial stationery; lables, cartons, point of-sale display materials etc.
- 2. Visual Ingredients, Graphic Design Principles and Layout:
- 2.1 Graphic design principles:Balance, geometrical and optical centres, white space, optical space, harmony, contrast, unity, proportion, rhythm, emphasis, simplicity, etc.
- 2.2 Visual ingredients: Point, line, shape, mass, size and scale, colour, tone, texture, pattern, etc.
- 2.3 Layouts: Purpose and function, stages of latest layout techniques.
- 3. Typography:
- 3.1 Introduction to printing type and composing techniques.
- 3.2 Selecting type face suitable to the subject or purpose. Relationship between type face and printing processes, between type face and paper surfaces. Legibility and readability.
- 3.3 Monograms, trade marks and logotypes.
- 4. Typesetting Techniques:
- 4.1 Typesetting materials, tools and equipment required, principles of setting text, display, tables and tabular setting by latest software.
- 4.2 Different methods of typesetting: Introduction to hand setting and machanical setting, photo, digital setting *By

various software).

4.3 Proof reading: Proof reader and Copy holder, proof reading marks, kinds of proofs, proof reading procedure. Correcction and page make up.

PRACTICALS

- (1) GRAPHIC DESIGN (15 MARKS)
- 1. Collection of Specimens of printed products and their study.
- 2. Collection of specimens of type faces related to main groups of type design.
- 3. Layout preparation for simple title pages of the book, text pages, letterheads, visiting cards, invitation cards, envelopes, greeting cards, certificates, pamphlets and leaflets.
- (2) TYPOGRAPHY (25 MARKS)
- 1. Drawing of lay of the type cases for Hindi and English.
- 2. Create headlines and captions (Reading line, Multiline, Leading type size and colour).
- 3. Letterhead setting in English and Hindi.
- 4. Visiting card, invitation card setting in English and Hindi. Proofing proof reading and correcting typeset matter.

Note :-

The students shall be required to produce at the time of Internal and External Examination a portfolio of specimens of prescribed practical work duly signed by him and his teacher.

REFERENCE BOOKS

- 1. Art & Production , N.N. Sarkar, Sagar Publication, New Delhi.
- 2. A Hand Book of Typography, Kailas, Anupam prakashan, Allahabad.
- 3. Theory & Practical of composition, A.C. Goel, Saroj Prakashan , Allahabad.
- 4. Adhunik Sanyojan shastra, C.S. Misra, Anupam prakashan, Allahabad.
- 5. Compossing & Typography Today, B.D. Mendiratta, Printek Publication, New Delhi.
- 6. Exploring Typography : By Tova Rabinowitz Publisher : Thomson Delmar Learning ; U.K.

1.5 PRINTING PROCESSES-I

Rationale:

This is a core subject of printing technology. It is essential for students to learn about the basics of various printing processes, and printing machines.

- 1. Introduction To Printing Technology:
- 1.2 Different printing Processes and their Modern uses
- 1.3 Suitability and limitations of each printing process for various jobs and purposes.
- 1.4 Outline of printing production process with basic ideas of Current practices in the ares of prepress in press and postpress operations.
- 1.5 Introduction to house keeping.
- 2. Letterpress Printing Technology:
- 2.1 Introduction to Machine room equipments and materials.
- 2.2 Classification, functions and uses of letterpress machines,
- 2.3 Introduction to basic mechanical and operational feature of letter press platen machine, Impression and ink transfer methods. Impression and ink transfer methods in letterpress machines.
- 2.4 Introduction to Premake-ready and Make-ready operations
- 2.5 Introduciton to Running defects, their causes and remedies.
- 3. Flexography Printing Techniques:
- 3.1 Introduction to Flexographic Printing and its uses in Printing Industry
- 3.2 Basic principle of flexographic printing.
- 3.3 Types of substrates used in flexographic printing.

LIST OF PRACTICALS

1. Introduction to the printing process department.

26

- 2. Demonstration and proper use of various tools and equipments.
- 3. Sample collection of various printed materials.
- 4. Simple imposition exercise up to 8 pages upright and oblong.
- 5. Locking up of the matter and dressing, picking of impression surface.
- 6. Handling, make-ready and operation of printing machines.
- 7. Printing and proffing of various small jobs.
- 8. Sample collection of various printing papers/substrates.
- 9. Demonstration of flexography printing.

REFERENCE BOOKS

- 1. Letter press printing part I-II, C.S. Misra, Anupam Prakashan, Allahabad.
- 2. Akshar Mudran Shastra, C.S. Misra, Anupam Prakashan, Allahabad.
- 3. Printing Processes, V.S. Krishnamurthy, Chennai.
- 4. What the printer should know about ink- Dr. Nelson Ra Eldced- GATF Press.
- 5. What the printer should know about paper Lawrance A Wilson GATF Press

1.6 BASIC ACCOUNTANCY

Rationale:

All productive activities in an industry are motivated by profit. An accountant analyses the financial aspect of a business to give a correct picture as to whether it is running on profit or at a loss, as well as how that profit has been made or that loss sustained. People in printing management should be able to do this evaluation with a view to enahancing the profit or eliminating the loss of an organisation.

DETAILED CONTENT

- Accountancy: Definition- object of accountancy- double entry system - explanation of terms - first principles of double entry.
- 2. Journal: Rules of journalising division of accounts the importance of ledger balancing personal accounts cash accounts, goods accounts, closing of real accounts closing of normal account, capital account, drawing account.
- 3. Sub division of journals: the cash book, bank reconciliation statement, journal proper and its objects, rectification of errors. Brief descriptions of profit and loss accounts and balance sheet.

Reference Books

- 1. Batliboi, Double Entry Book Keeping.
- 2. Basic Accounting, Goel, Himalaya Publishing House Mumbai.

2.1 APPLIED MATHEMATICS I (B) [Common to All Engineering Courses]

L T P 3 2/2 -

Rationale:

The study of mathematics is an important requirement for the understanding and development of any branch of engineering. The purpose of teaching mathematics to diploma engineering students is to impart them basic knowledge of mathematics which is needed for full understanding and study of engineering subjects.

S.N.	Units		Coverage		
		L	T	P	
1.	Integral Calculus-I	12	4		
2.	Integral Calculus-II	12	4	_	
3.	Coordinate Geometry (2 Dimensional)	10	3	_	
4.	Coordinate Geometry (3 Dimensional)	8	3	_	
_		42	14	_	

DETAILED CONTENTS:

1. INTEGRAL CALCULUS - I : (14 Marks)

Methods of Indefinite Integration :-

- 1.1 Integration by substitution.
- 1.2 Integration by rational function.
- 1.3 Integration by partial fraction.
- 1.4 Integration by parts.
- 2. INTEGRAL CALCULUS -II : (14 Marks)
- 2.1 Meaning and properties of definite integrals, Evaluation of definite integrals. Integration of special function.
- 2.2 Application: Finding areas bounded by simple curves, Length of simple curves, Volume of solids of revolution, centre of mean of plane areas.
- 2.3 Simposns 1/3rd and Simposns3/8th rule and Trapezoidal Rule:

29

their application in simple cases.

- 3. CO-ORDINATE GEOMETRY (2 DIMENSION): (14 Marks)
- 3.1 CIRCLE:

Equation of circle in standard form. Centre - Radius form, Diameter form, Two intercept form.

3.2 Standard form and simple properties

Parabola x2=4ay, y2=4ax,

- 4. CO-ORDINATE GEOMETRY (3 DIMENSION): (8 Marks)
- 4.1 Straight lines and planes in space -

Distance between two points in space, direction cosine and direction ratios, Finding equation of a straight line and Plane (Different Forms),

4.2 Sphere x2 + y2 + z2 + 2gx + 2fy + 2wz=d (Radius, Centre and General Equation)

2.2 APPLIED PHYSICS-II

[Common to All Engineering Courses]

L T P 3 2/2 4

Rationale:

Engineering physics is a foundation Course. Its purpose is to develop proper understanding of physical phenomenon and scientific temper in the students. While teaching the subject, teachers should make maximum use of demonstrations to make the subject interesting to the students.

TOPIC WISE DISTRIBUTION OF PERIODS

Sl.No.	Topics	L	Т	P
1.	Optics	4	1	
2.	Introduction To Fiber Optics	4	1	_
3.	Laser & its Application	4	1	_
4.	Electrostatics	4	1	_
5.	D.C. Circuits	4	1	_
6.	Magnetic Materials & Their Properties	4	1	_
7.	Semi Conductor Physics	4	1	_
8.	Introduction Diode & Transistors	4	2	_
9.	Introduction To Digital Electronics	4	2	_
10.	Non-conventional energy sources	6	3	-
		42	14	56

1. Optics (4 Marks)

Nature of light, Laws of Reflection and Refraction, Snell's Law, Interference (Constructive and Deotructive), Diffraction and Polarization (Concept Only), Law of Mallus and Polaroids.

2. Introduction To Fibre Optics : (5 Marks)

Critical angle, Total internal reflection, Principle of fibre optics, Optical fibre, Pulse dispersion in step-index fibres, Graded index fibre, Single mode fibre, Optical sensor.

3. Lasers and its Applications (4 Marks)

Absorbtion and Emission of energy by atom, Spontaneous and Stimulated Emission, Poluation inversion, Main component of laser and types of laser- Ruby Laser, He-Ne laser and their

applications. Introduction to MASER.

4. Electrostatics : (4 Marks)

Coutomb's Law, Electric field, Electric potential, Potential energy, Capacator, Energy of a charged capacitor, Effect of dielectric on capacators.

5. D.C. Circuits (5 Marks)

Ohm's Law, Kirchoff's Law and their simple application, Principle of Wheat Stone bridge and application of this principle in measurement of resistance (Meter bridge and Post Office Box); Carey Foster's bridge, potentiometer.

6. Magnetic Materials and Their Properties: (5 Marks)

Dia, Para and Ferro-magnetism, Ferrites, Magnatic Hysteresis Curve and its utility. Basic idea of super conductivity, Meissner's effect.

7. Semiconductor Physics (4 Marks)

Concept of Energy bands in soldis, classification of solids into conductors, insulators and semiconductors on the basis of energy band structure. Intrinsic and extrinsic semi conductors, Electrons and holes as charge carriers in semiconductors, P-type and N-type semiconductors.

8. Junction Diode and Transister: (6 Marks)

Majority and Minority charge carriers, P-N junction formation, barrier voltage, Forward and reverse biasing of a junction diode, P-N junction device characteristics, Formation of transistor, transistor-action, Base, emitter and collector currents and their relationship LED's.

9. Introduction To Digital Electronics : (6 Marks)

Concept of binary numbers, Interconversion from binary to decimal and decimal to binary. Concepts of Gates (AND, NOT, OR).

- 10. Non-conventional energy sources: (7 Marks)
 - (a) Wind energy: Introduction, scope and significance, measurement of wind velocty by anemometer, general principle of wind mill.
 - (b) Solar energy: Solar radiation and potentiality of solar radiation in India, uses of solar energy:

Solar Cooker, solar water heater, solar photovoltaic cells, solar energy collector.

PHYSICS LAB

Note: Any 4 experiments are to be performed.

- 1. Determination of coefficient of friction on a horizontal plane.
- 2. Determination of 'g' by plotting a graph T2 verses 1 and using the formula g=4n2/Slope of the graph line
- 3. Determine the force connstant of combination of springs incase of 1. Series 2. Parallel.
- 4. To verify the series and parallel combination of Resistances with the help of meter bridge.
- 5. To determine the velocity of sound with the help of resonance tube.
- 6. Determination of viscosity coefficient of a lubricant by Stoke's law.
- 7. Determination of E1/E2 of cells by potentio meter.
- 8. Determination of specific resistance by Carry Foster bridge.
- 9. Determination of resitivity by P.O.Box.
- 10. Verification of Kirchoff's Law.
- 11. To draw Characteristics of p-n Junction diode.
- 12. To measure instantaneous and average wind velocity by indicating cup type anemometer/hand held anemometer.

NOTE :

Students should be asked to plot a graph in experiments (where possible) and graph should be used for calculation of results. Results should be given in significant figures only.

2.3 APPLIED CHEMISTRY

[Common to All Engineering Courses]

L T P 6 - 4

Rationale:

Engineering Chemistry has profound and deep relationship with the industrial and environmental technology. This curriculum intends to impart technical knowledge alongwith productive practice to the students of the diploma engineering. The teachers are expected to guide the students in the classroom and the laboratories according to the curriculum by demonstrations and by showing relevant materials and equipments to inculcate interests in learning among students.

TOPIC WISE DISTRIBUTION OF PERIODS

Sl.No	o. Topics	L	Τ	P
1.	Atomic Structure	4	_	_
2	Chemical Bonding	6	-	_
3.	Classification of Elements	4	-	_
4.	Electro Chemistry-I	7	_	_
5.	Electro Chemistry-II	8	_	-
6.	Chemical Kinetics	4	_	_
7.	Catalysis	4	_	_
8.	Solid State	4	_	_

10.	Water Treatment	6	_	_
11.	Colloidal State	4	_	_
12.	Lubricants	4	_	_
13.	Hydrocarbons	7	_	_
14.	Organic Reactions & Mechanism	8	_	_
15	Polymers	4	_	_
16	Synethetic Materials	6	-	-
		84		 56

DETAILED CONTENTS:

1. ATOMIC STRUCTURE : (3 MARKS)

Basic concept of atomic structure, Matter wave concept, Quantum number, Haisenberg's Uncertainty Principle, Shaples of orbitals.

2. CHEMICAL BONDING : (4 MARKS)

35

Covalent bond, Ionic & Co-ordinate, Hydrogen bonding, Valence bond theory, Hybridisation, VSEPR theory, Molecular orbital theory.

3. CLASSIFICATION OF ELEMENTS : (3 MARKS)

Modern classification of elements (s,p,d and f blcok elements), Periodic properties: Ionisation potential electro negativity, Electron affinity.

4. ELECTRO CHEMISTRY-I: (3 MARKS)

Arrhenius Theory of electrolytic dissociation, Transport number, Electrolytic conductance, Ostwald dilution law. Concept of Acid and bases: Bronsted, Arrhenius and Lewis theory. Concept of pH and numericals. Buffer solutions, Indicators, Solubility product, Common ion effect with their application,

5. ELECTRO CHEMISTRY-II: (3 MARKS)

Redox reactions, Electrode potential (Nernst Equation), Electro-chemical cell (Galvanic and Electrolytic). EMF of a cell and free energy change. Standard electrode potential, Electro chemical series and its application. Chemical and Electrochemical theory of corrosion, Galvenic Series. Prevention of corrosion by various method.

6. CHEMICAL KINETICS : (3 MARKS)

Law of mass action, order and molecularity of rection. Activation energy, rate constants, Ist order reactions and 2nd order reactions.

7. CATALYSIS : (2 MARKS)

Definition Characteristics of catalytic reactions, Catalytic promotors and poison, Autocatalysis and Negative catalysis, Theory of catalysis, Application.

8. SOLID STATE : (2 MARKS)

Types of solids (Amorphous and Crystalline), Classification (Molecular, Ionic, Covalent, Metallic), Band theory of solids (Conductors, Semiconductors and Insulators), types of Crystals, FCC, BCC, Crystal imperfection.

9. FUELS : (3 MARKS)

Definition, its classification, high & low Calorific value. Determination of calorific value of solid and liquid

fuels by Bomb calorimeter.

Liquid fuel - Petroleum and its refining, distillate of petroleum (Kerosene oil, Disel and Petrol), Benzol and Power alchol. Knocking, Anti-knocking agents, Octane number and Cetane number.

Cracking and its type, Gasoling from hydrogenation of coal (Bergius process and Fischer tropsch's process)

Gaseous Fuel - Coal gas, Oil gas, Water gas, Producer gas, Bio gas, LPG and CNG.

Numerical Problems based on topics

10. WATER TREATMENT : (3 MARKS)

Hardness of water, Its limits and determination of hardness of water by EDTA method. Softening methods (Only Sods lime, Zeolote and Ion exchange resin process). Disadvantage of hard water in different industries, scale and sludge formation, Corrosion, Caustic embritlement, primming and foarming in biolers.

Disinfecting of Water By Chloramine-T, Ozone and Chlorine. Advantage and disadvantage of chlorinational, Industrial waste and sewage, Municipality waste water treatment, Definition of BOD and COD. Numerical Problems based on topics.

11. COLLOIDAL STATE OF MATTER: (3 MARKS)

Concept of collidal and its types, Different system of colloids, Dispersed phase and dispersion medium.

Methods of preparation of colloidal solutions, Dialysis and electrodialysis. Properties of colloidal solution with special reference to absorption, Brownian Movement, tyndal effect, Electro phoresis and coagulation. relative stability of hydrophillic and hydrophobic colloids. Protection and protective colloids. Emulsion, Types, preparation, properties and uses. Application of colloids chemistry in different industries.

12. LUBRICANTS : (3 MARKS)

Definition, classification, Necessasity and various kinds of lubricants. Function and mechanism of action of lubricants and examples. Properties of lubricants, Importance of additive compunds in lubricants, Synthetic lubricants and cutting fluids. Industrial application, its function in bearing.

- 13. HYDROCARBONS: (4 MARKS)
- A. Classification and IUPAC nomeuclature of organic compounds hamologous series (Functional Group)
- B. Preparation, properties and uses of Ethane, Ethene, Ethyne (Acetylene), Benzene and Toluene.
- 14. ORGANIC REACTIONS & MECHANISM: (4 MARKS)
- 1. Fundamental auspects -
 - A. Electrophiles and nucleophiles, Reaction Intermediates, Free radical, Carbocation, Carbanion
 - B. Inductive effect, Mesomeric effect, Electromeric effect.
- 2.A. Mechanism of addition reaction (Markonicove's Rule, Cyanohydrin and Peroxide effect),
- B. Mechanism of Substitution reactions; (Nucleophillic) hydrolysis of alkyle halide, electrophillic substitution halogenation, Sulphonation, Niration and friedel-Craft reaction.
- C. Mechanism of Elimination reaction Dehydration of primary alcohol, Dehyrohalogenation of primary alkyl halide.
- 15. POLYMERS : (3 MARKS)
- 1. Polymers and their classification. Average degree of polymerisation, Average molecular weight, Free radical polymerisation (Mechanisms)
- 2. Thermosetting and Thermoplastic resen -
 - A. Addition polymers and their industrial application-Polystyrene, PVA, PVC, PAN, PMMA, Buna-S, Buna-N, Teflon.
 - B. Condensation polymer and their industrial application:
 Nylon 6, Nylon 6,6, Bakelite, Melamine formaldehyde,
 Urea formaldehyde, Terylene or Decron, Polyurethanes.
- 3. General concept of Bio polymers, Biodegradable polymers and inorganic polymers(Silicon)
- 16. SYNETHETIC MATERIALS : (4 MARKS)
- A. Introduction Fats and Oils
- B. Saponification of fats and oils , Manufacturing of soap.
- C. Synthetic detergents, types of detergents and its manufacturing.

- 3. EXPLOSIVES: TNT, RDX, Dynamite.
- 4. Paint and Varnish

LIST OF PRACTICALS

- 1. To analyse inorganic mixture for two acid and basic radicals from following radicals
- A. Basic Radicals:

NH4+, Pb++, Cu++, Bi+++, Cd++, As+++, Sb+++,

Sn++, Al+++, Fe+++, Cr+++, Mn++, Zn++, Co++

Ni++, Ba++, Sr++, Ca++, Mg++

B. Acid Radicals:

CO3--, S--, SO3--, CH3COO-, NO2-,

No3- , Cl-, Br_ , I- , So4--

- 2. To determine the percentage of available Chlorine in the supplied sample of Bleaching powder.
- 3. To determine the total hardness of water sample in terms of CaCo3 by EDTA titration method using Eriochroma black-T indicator.
- 4. To determine the strength of given HCl solution by titration against NaOH solution using Phenolphthalium as indicator.
- 5. To determine the Chloride content in supplied water sample by using Mohr's methods.
- 6. Determination of temporary hard ness of water sample by O-Hener's method.

2.4 PRINTING PROCESSES-II

Rationale:

It is a core subject of printing technology. It is essential for students to learn about the basics of various printing processes, and printing machines.

- 1. Introduction:
 - Lithographic Printing
- 1.1 Origin and development of lithography.
- 1.2 Characterstics, suitability and limitations of lithography.
- 1.3 Principles of lithography and their application to image formation.
- 1.4 Image carriers for Lithographic Printing.
- 1.5 Lithographic presses: Kinds, basic mechanical features and uses.
- 1.6 Offset Printing machine room materials and accessories.
- 1.7 Pre make ready and make ready operations for printing Single colour text and line illustrations on sheetfed offset machines.
- 1.8 Running defects, causes and their remedies.
- 2. Gravure Printing
- 2.1 Gravure Image Carriers use in industry
- 2.2 Basic mechanical and operational features of various gravure printing machines: uses, advantages and limitations of gravure printing press. (Packaging Press, Label Press, Publication Press).
- 2.3 Outline of Gravure Printing Process.
- 3. Screen Printing
- 3.1 Manual and Photomechanical Image Carriers for Screen Printing.
- 3.2 Screen Printing inks Types, Properties.
- 3.3 Screen Printing Machines, Hand Printing Tables, Container Screen Printing, Flat Bed Hinged Frame (Automatic), Rotary Screen Printing, Carousal Printing Machine.
- 3.4 Outline of Screen Printing Process.
- 4. Digital Printing:
- 4.1 Basic knowledge of digital printing
- 4.2 Use of digital printing

PRACTICAL

- 1. Handling and maintenance of sheet Fed Offset Machine.
- 2. Pre-makeready (Pre-press operations) & Makeready on sheet fed offset machine.
- 3. Printing half sheet work (4 pages) text jobs on sheetfed offset machine.
- 4. Printing sheet work (8 pages) text jobs on sheetfed machine.
- 5. Printing single colour line illustration jobs on sheetfed machine.
- 6. Printing two-colour registration jobs on sheetfed machine.
- 7. Sample collection of printed materials
- 8. Sample collection of paper/substrate.

Note :-

The student shall be required to produce at the time of internal and external examination a portfolio of specimen verified by his teacher.

REFERENCE BOOKS

- 1. Technology of offset printing, C.S. Misra, Anupam prakashan, Allahabad.
- 2. Offset Mudran Shastra, C.S. Misra, Anupam prakashan, Allahabad.
- 3. Commercial Screen Printing, Bhamare, Adorn Publication Naupada, Thane.
- 4. Complete Screen Printing, K.K. Agrawal, Dehati Pustak Bhandar, Delhi.
- 5. Machine Printing, Focal Press, London.
- 6. Vyavsayik Screen Printing, Bhamare, Adorn Publication Naupada, Thane.
- 7. Screen Process Printing -By John Stephens, Blue Print, An imprint of Hapman and Hall, London
- 8. Modern Gravure Technology By Harry B. Smith, Pira International, U.K.

2.5 ENGINEERING DRAWING

Rationale:

Engineering Drawing is one of the most important modes of communication used by Engineers and Technicians. Technicians being middle level supervisors in between Engineers on one side and Craftsmen on the other side, they should be well versed with reading and interpreting the Engineering Drawings. Though the printing technicions may not be required to prepare instrument perfect drawings, they should be congversant with the systems and conventions followed as per proficiency in free hand sketching which will help them solving day to day problems.

Detailed Contents Practicals

- 1. Introduction
- 1.1. Scope of the subject: Paper sizes and layout as per Indian Standards, Instruments used for drawing.
- 1.2 Scale of drawing reduced and enlarged scale drawings.
- 2. Free hand lettering
- 2.1 Designation of letters, Size of letters as per Indian Standards, Types and conventions of lines as per indian Standards.
- 2.2 Practice in lettering single stroke letters and numerals.
- 3. Dimensioning as per Indian Standards.
- 3.1 Need for dimensioning, Conventions of dimensioning: Aligned dimensioning and unidirectional demensioning.
- 3.2 Chain dimensioning, Parallel dimensioning, Progressing dimensioning, Dimensioning from datum.
- 4. Orthographic Projection
- 4.1 Definition, Principal planes H.P. and V.P.
- 4.2 Minimum munber of views required to describe an object.
- 4.3 Method of obtaining the views.
- 5. First angle and Third angle Projections.
- 5.1 Relative position of viewer object and plane in first angle and third angle projection, Placements of views in

first angle and third angle projections.

- 5.2 Free hand sketching of the objects given in three dimensions.
- 5.3 Identification of the angle of projection used in a drawing, Supplying missing lines in the given views.
- 5.4 Drawing of views for some real objects from Printing Technology.
- 6. Sectioning
- 6.1 Need for sectioning, Types of sectioning: Half, full and revolved sections, Choosing the correct sectional plane.
- 6.2 Drawing sectional view, Conventional representation of materials in section as per Indian Standards.
- 7. Pictorial Drawing.
- 7.1 Need for pictorial drawing, Types of pictorial drawing: Isometric drawing, cabinet drawing and cavalier drawing.
- 7.2 Prepare pictorial drawing of simple components.
- 8. Free hand Sketching.
- 8.1 Free-hand sketching of the pictorial view when three views are given.
- 8.2 Free-hand sketching of Isometric view of simple components.
- 9. Interpretation of Engineering Drawing.
- 9.1 Detailed drawing, Assembly drawing, Production drawing.
- 9.2 Making simple sketches from working drawings, Identity the system of projection used.
- 9.3 The system of dimensioning used, Compute the unknown dimension from given dimension.
- 9.4 Visualise the components when the orthographic views are given, Visualise the internal details from sectional views.
- 10. Conventions
- 10.1 Conventional representation of the following as per ISI External & Internal threads , Springs (Spiral, Leaf, Helical), nut & bolts, gear, splined shaft, bearing,

- straight & diamond knurling, ratchet & pinion, square & hexagonal on shaft welded & rivetted joints, welded symbol & conventions.
- 11 Machine Elements
- 11.1 Thread profiles- BSW , Acme , square , metric & V threads along with their angles & projections
- 11.2 Keys- sketching isometric views & orthographic views of parallel & taper sunk key, Gib head key, round key or pin , wood ruff key
- 11.3 Free hand sketching of following saft coupling-(a) Muff coupling (b) Flanged coupling (c) Universal coupling.
- 11.4 Lockingdevices.
- 12 Free Hand Sketching

NOTE :-

The subject should not be treated conventionally where the students are always drawing instrument perfected drawings. Instead most of the time the students will be required to complete structured and graded exercises as worksheets (as given in reference 2)

Other Resources.

3.1 BASIC ENGINEERING-I

Rationale:

Modern printing equipments and machines incorporate all the engineering disciplines, like electrical, mechanical, electronics and computers. The print technician who has to handle some of the high-tech equipments in supervising the work of the operation of these machines, should be fully aware of the principles of these engineering disciplines. He should also be able to identify the problems and faults likely to occur during the operation of these printing machines.

Hence, the technicans working in the printing industry are required to know the electrical, electronics and mechanical engineering devices inputs.

Detailed Contents

(A) THEORY:

- 1. Mechanical Engineering:
 - 1.1 Mechanical components: Links, nuts, bolts, screw, studs, key, rivets, pin, cotters, levers, shafts, couplings, clutches, brakes, belts bearings, pulleys, gears, cams, chains, spokets.
 - 1.2 Measuring devices: calipers, verniers, screw gauges, micrometers, feeler gauges, dial gauges, Durometers
 - 1.3 Manufacturing processes: Soldering, welding, rivetting processes, metal forming processes, foundry, forging and forming. Metal shaping processes, machining processes.
 - 1.4 Lubricant and lubricating devices: Viscosity, types of lubricants, principles, characteristics, and applications. Lubrication system.
 - 1.5 Maintenance: Preventive maintenance break down maintenance equipment and machines required for maintenance shop. Maintenance contracts, periodical maintnance.
- 2. Hydraulics and Pneumatics :

- 2.1 Hydraulics: Principles, hydraulics in printing.
- 2.2 Pneumatics: basic principles of compressors. Vacuum pumps. 1.1 Introduction to basic principles.

3. MACHINE DRAWING

- 3.1 Interpretation of engineering drawing.
- 3.2 Making of simple sketches from which working drawing can be prepared by a draughtsman.

4. ELECTRICAL SYSTEMS

- 4.1 Electrical Terms and definitions: electric current and voltage, ohm's law, resistance law ,conductor, resistor and insulator. Horse power, watt, KWh and their relationship with current, voltage and resistance. D.C. and A.C., KVA, KW and KVA powers. power factor, its magnitude, nature significance.
- 4.2 Electrical sources (cell, battery and supply):
 Electrical loads (resistance capacitance and inductance)
 and their behaviour in D.C. supply. Electrical circuit
 and concept of open circuit, closed circuit and short
 circuit. series, parallel and series-parallel connection
 of cells, resistors and capacitors, their purpose and
 equivalent valves.

PRACTICALS

- 1. Study of various mechanical components, nuts, bolts, hubs, screws, couplings. pulleys, bearings, brakes and clutches
- 2. To Study the operation and use various measuring devices : calipers, micrometers, screw gauge, feeler gauges and dial gauges.
- 3. To study soldering, welding and rivetting processes. Relationship of viscosity and temperature.
- 4. To use Redwood Viscometer and finding viscosity and the relationship of viscosity and temperature.
- 5. To Study of equipment and machines for maintenance shop.
- 6. To study and learn Hardware Testing.
- 7. To Study air compressors.

3.2 GRAPHIC REPRODUCTION

Rationale

Graphic Reproduction is an important area of Printing Technology. It is essential to impart basic knowledge and skills in process photography, photomechanical processes for preparting surfaces for different printing processes, etc. This subject is essential as prerequisite for studying Reproduction Photography and Printing Surfaces in the Diploma Curriculum.

DETAILED CONTENT

- 1. Introduction and outline of Gaphic Reproduction:
- 1.1 Introduction, functions and outline of graphic reproduction.
- 1.2 Originals for reproduction: Classification (Line, Halfftone, continuous Tone), characteristics and requirements.
- 1.3 Introduction to reproduction photography and photomechanical processes.
- 2. Equipment and Accessories:
- 2.1 Process Camera; basic parts, kinds and functions, Process lens, Lateral reversal, illuminate, light integrator.
- 3. Photographic Film Emulsions:
- 3.1 Introduction to photographic film and emulsions; types of photographic emulsions and their uses in reproduction photography.
- 4. Contact Photography:
- 4.1 Equipment and accessories in contact photography
- 4.2 Preparation of positives from line negative and Vice-Varsa.
- 5. Line Photography:
- 5.1 Handling of Camera; Exposure and factorol governing exposure time.
- 5.2 Development, Fixing and after treatments.
- 5.3 Defects in the negative and their remedies.
- 6. Application of Processed Film :

- 6.1 Introduction to Photomechanical image carriers for different printing processes.
- 6.2 Process of surface platemaking for planographic printing; equipment and materials used.
- 6.3 Use of Process film in duplicating processes.

LIST OF PRACTICAL

- 1. Preparation of negatives / positives by contact photography.
- 2. Handling of Process Camera for line negative making.
- 3. Line negative making in same size.
- 4. Line negative making in reduced /enlarged size.
- 5. Retouching and correction of faulty line negatives.
- 6. Line block making on zinc.

REFERENCE BOOKS

- 1. Line Photography, Davis Robinson, AIFMP, New Delhi.
- 2. Halftone Photography, Erwin Jaffe, AIFMP, New Delhi.

3.3 PRINTING SCIENCE

Rationale:

The Student will learn the scientific approach to the different printing materials. He will also learn about the testing of materials for quality control. The subject will make the student to learn about the chemical reactions invloved in the various stages of Reproduction Photography, Surface Preparation, Press work etc.

DETAILED CONTENTENT

- 1. Materials used for Image Carriers :
- 1.1 Relief Process: Type metal alloys. Original plates: Zinc and copper for blocks; photopolymer plates, Duplicate plates: stereo and electro.
- 1.2 Planography: Zinc, aluminium, anodized aluminium, bimetallic and trimetallic plates, presentsitised plates, photopolymer plates, paper based plates.
- 1.3 Intaglio: Metals used for gravure cylinders and plating.
- 1.4 Materials used for other processes. e.g. Flexography, Screen, Dry offset.
- 2. Photographic Materials:
- 2.1 Basic ingredients of emulsion and their functions.
- 2.2 Emulsion process, control of sensitometric qualities and sensitometric properties, emulsion structure.
- 2.3 Developer's constituents and their functions.
- 2.4 Chemicals for after treatment.
- 2.5 Introduction to non silver material.
- 3. Polymers:
- 3.1 Monomers and Polymers.
- 3.2 Homopolymers and Copolymers.
- 3.3 Types of polymerisation reactions: Addition polymerisation and condensation polymerisation.
- 3.4 Types of Polymers: Plastics, rubber and Fibres.

- 3.5 Composition and characteristic properties of the ploymers: Printing ink resin and vechicles, adhesives, film base, cellulose and gelatin.
- 4. Colloids:
- 4.1 Characteristics.
- 4.2 Methods of preparation and properties.
- 4.3 Application in printing industry.
- 5. Substrates:
- 5.1 Fibrous and non finrous raw materials used in paper and board manufacture.
- 5.2 Surface treatment related to ultimate use.
- 5.3 Varieties of papers and boards: Characteristics, classification, identification selection of choice for different classes of print jobs and printing processes.
- 5.4 Dimensional stability of paper: Effect of humidity on paper.
- 5.5 Other substrates: Metal foil, plastic, cellophane, etc.
- 6. Printing Inks:
- 6.1 Constituents of printing ink, general characteristics and requirements of printing inks for various printing processes.
- 6.2 Basic drying methods and their suitability for printing processes.
- 6.3 Three and four colour process inks for letterpress and lithography.
- 6.4 Different inks, e.g. heat set, quick set inks, fugitive, metallic inks, etc., their suitability to different applications.
- 6.5 Flexo and Gravure inks.
- 7. Digital Printing Science:
- 7.1 Digital Ink Powder Type, Solvent Type
- 7.2 Substrates used for digital printing

8. Testing of Materials

LIST OF PRACTICALS

- 1. Ink Tests, acid value test, tone and undertone tests.
- 2. Opacity test.
- 3. Drying and bleeding tests.
- 4. Emulsification tests.
- 5. Printability tests for papers.
- 6. Print quality tests for papers.
- 7. Mass, ink tests, stone and undertone tests.
- 8. Tests for end requirements.

References Books

- 1. Printing inks and papers, C.S. Misra, Anupam Prakashan, Allahabad.
- 2. Mudran Syahiyan Tatha Kagaj, C.S. Misra, Anupam Prakashan, Allahabad.

3.4 PRINTING DESIGN - I

Rationale

Every printed product is designed before it is printed. The print technician should have a clear perspective of the design principles involved in designing a printed product. The objective of this subject will be to introduce the study of design as a decision making discipline which controls all the aspects of the printing production.

Detailed Contents.

- 1. Illustrative Elements:
- 1.1 Types of originals for illustration and their reproduction:
 Line and continuous tone copies in colour and black and white.
- 1.2 Requirements of Art work or originals for reproduction; treatment of photographs, photomechanical transfer materials and their uses
- 1.3 Black and white photopgraphs: high contrast and medium contrast.
- 1.4 Improving quality of photographic prints; Masking; Scaling; Cropping, retouching, use of air-brush.
- 2. Colour Elements:
- 2.1 Colour theory; terms used to describe colour; warm and cold colours; hue shade; tint.
- 2.2 Colour wheel; terms used to describe relationship between colours monochromatic, complementary, analogul, split-complimentary.
- 2.3 Selection of colours for two or three or four colour jobs.
- 2.4 Attributes and emotional appeal for colours.
- 2.5 Choice and effective use of colours; colour harmony, colour contrast, and colour values.
- 3. Layout Preparation:
- 3.1 Materials, tools, equipment and techniques used in the preparation of layout and art work.
- 3.2 Basic geometric shapes, disposition of elements and space; principles of symmetrical and asymmetrical arrangements;

distinction between geometric and optical centres.

- 3.3 Preparation of the layout, analysis of briefs, stages and house style.
- 3.4 Methods of producing different forms of layout.
- 3.5 Page structures, arrangement of illustrations and text matter.
- 3.6 Dummy: its uses and preparation.
- 4. Typographic Design:
- 4.1 Methods of preparing a design and its various stages, for different classes of work.
- 4.2 Typogrphic specifications for different classes of work.
- 4.3 Art work preparation for different classes of work in relation to different printing processes, paper and ink, etc.

PRACTICAL

- 1. Interpretation of copy and preparation of rough and finished layouts for typegraphic setting.
- 2. Lettering for layouts.
- 3. Designing of monograms and trade marks with the help of appropriate computer software.
- 4. Designing of recto and verso pages of book.
- 5. Designing of pages for poetry and children's books.
- 6. Designing of book covers and jackets.
- 7. Designing of lables.
- 8. Designing of single and two colour posters.
- 9. Designing of single and two colour leaflets upto 6 pages.
- 10. Preparation of dummies for books, leaflets and display materials.
- 11. Colour mixing in two, three and four colour combination.

Note -

The students shall be required to produce at the time of Internal and External Examination portfolio of specimens of prescribed practical work duly signed by him and verified by his teacher.

- 9. Exploring Typography By TOVA Rabinwitz Publisher, Thomson-Delmar Learning; UK.

3.5 BINDING & PACKAGING-I

Rationale:

This is a core subject. After printing is complete, the printed sheets are required to be put in a proper shape such as books, magazine, register, etc. For this, knowledge of various methods and techniques of binding and finishing is very essential.

Detailed Contents

- 1. Warehouse and Binding Operations:
- 1.1 Printed paper warehouse and unprinted paper warehouse, storing, temperature, humidity, materials handling, safety.
- 1.2 International paper sizes, Conventional paper sizes, and
 sub divisions of paper.
- 1.3 Book Binding: styles of book binding, basic equipments used in binding.
- 1.4 Binding Operations: Jogging, folding gathering, collating, stiching, sewing, cutting and trimming operations, machines in use. Treatment of plates and maps, tipping and guarding.
- 2. Securing Operations:
- 2.1 Use of thread, tape, cord, wire-stitching, looping, gluing, pasting, covering.
- 2.2 Different kinds of sewing, cord sewing and tape sewing, hand sewing and machine sewing, two on through and all along sewing, over casting for looseleaf works, suitability for different styles of binding.
- 2.3 End papers: single, made end paper, cloth-joint, leather-joint, fly leaf, zigzag end papers, their objectives.
- 3. Forwarding Operations:
- 3.1 In board and out board forwarding, different kinds of binding and styles, publishers, library, miscellaneous and deluxe extra leather, stationery binding- characteristics.
- 3.2 Gluing the back, rounding and backing, objects, care and precautions, reducing swell in the back, flat backs, back lining.

- 4. Adhesive binding, thermoplastic, unsewn, threadless and perfect binding.
- 5. Preparation and Attaching Boards:
- 5.1 Dimensional variation of boards, lining. cutting to size, warping of boards, prevention, attaching boards, laching-in.
- 6. Covering Operations:
- 6.1 Different kinds of covering materials, selecting leather of other materials, measuring and cutting to size and shape, applying adhesive and turning-in, pressing, setting the groove or joints, setting the head, setting the band, polishing, pressing and pasting down.
- 7. Finishing:
- 7.1 Miscellaneous Operations : Cutting, Creasing, Numbering, Perforating, Embossing, Thermography, etc.
- 7.2 Decorating the cover of the book with the finishing tools, blind blocking, gold blocking, and sliding hand tools, fillets, gallets, rules and mitre, Lettering, type holder, brass type, marking for tooling and lettering, heating, testing and pressing, cleaning, inlaying, lacing and bands open-up and pressing.
- 7.3 Edge decoration, colouring, spraying, marbling, guilding, gauffering or tooling the edges, head bands, Book mark, Bode mark, hand made and machine made head bands.

LIST OF PRACTICALS

- 1. Study of tools and machinery, their uses and care in handing.
- 2. Materials and supplies essential for a book binding department.
- 3. Folding, counting and jogging.
- 4. Side and saddle Odd and even number stitching.
- 5. End papers.
- 6. Styles of binding: Quarter- bound cut flush (Library sewing), Quarter bound, turned in (Library Sewing), Quarter-bound turned in (Sawn-in-sewing)

- 7. Manifold book (Carbon duplicate book)
- 8. Tear-off pad.
- 9. Oneletter index book Styles of binding Quarter-bound turned-in with squares (Flexible sewing), Quarter-bound truned-in with squares (Two-on sewing), Case binding (Overcast sewing), Publisher binding (Library sewing).
- 10. Half-bound (conventional method): Calico and marble with gilding, spine preparing and spine decorating with ink, leather paring and gilding the spine, phot- album with colour strings.
- 11. Account book binding: half-bound (modern style) leather and calico, and gilding, file-making or loose-leaf binding with screws.
- 12. Rebinding-Case Binding.
- 13. Writing pad with gild corners
- 14. Exercise on sewing machine, exercise on stitching, looping and cutting machine.
- 15. Finishing processes: Operation of ruling machine, operation of blocking machine, numbering machines: hand numbering and type-high numbering machine, operations care and maintenance. Planning a job for hand numbering, finishing leather, calico cover with gold foil embossing, hand tooling and blind tooling methods, bronzing varnishing and other surface treatments.

3.6 ENTREPRENEURSHIP DEVELOPMENT

Rationale:

In the face of rising unemployment and introduction of Capital- intensive techniques of production in printing industries, the student of Printing Technology (Diploma Course) should have a basic theoretical training on self-employment. The Governments - both Central and the States do also endorse this idea as their activites in providing bank loans and other assistance to these aspirant self-employed technologists have increased.

This subject, is therefore, very essential in the curriculum of diploma course in printing technology. This will enable the students to plan for the establishment, to know about the inventory control, production possibility, quality control, purchase mechanism, sales mechanism and such others so that he can successfully drive through the break-neck competitions in this field of printing.

DETAILED CONTENT

1. Entrepreneurship:

Definition, responsibilities, project report on feasibility, studies for small scale industries, proposal for bank loan for establishing a press and its extension, obtaining licenses, Enlistments as a Supplier.

- 2. Location and layout of a press, choice of site , facotrs influencing product and process layout plan , layout criteria for a good layout, good materials handling system.
- 3. Materials Management:

Purchase: importance, functions, methods and procedure, control - stock levels, re-ordering and economic ordering quantity.

4. Cost of Product:

Significance, prime cost and supplemented variability of all costs in the long-run, marginal cost and A.C. and M.C. consists of V.C. only. Opportunity cost, SRC adn LRC, TR, AR.

- 5. Sales and marketing with special reference to printing/printed materials.
- 6. Quality Control:

From receipt of order to delivery of products.

7. Communication:

Meaning, purpose, formal and informal methods of communication.

8. The conduct of meeting, writing of reports and letters.

4.2 BASIC ENGINEERING-II

Rationale:

Modern printing equipments and machines incorporate all the engineering disciplines, like electrical, mechanical, electronics and computers. The print technician who has to handle some of the high-tech equipments in supervising the work of the operation of these machines, should be fully aware of the principles of these engineering disciplines.

He should also be able to identify the problems and faults likely to occur during the operation of these printing machines. Hence, the technicans working in the printing industry are required to know the electrical, electronics and mechanical engineering devices inputs.

Detailed Contents

1. ELECTRICAL ENGINEERING

1.1 A. C. Circuits

Single phase supply its frequency, instantanious value, RMS value and form factor. behaviours of pure resistance, inductance and capacitance in A.C. supply. Impedance, current power factor and power in single phase RLC series and parallel circuits.

1.2 Three Phase Supply:

Star and delta conversions. Line current, line voltage, phase current, phase voltage and power relations in star and delta connections.

1.3 Energy Conversion Principles:

Conversions of electrical energy into heat and light. heater, bulb and tubelight and their current, voltage and power.

1.4 Magnetic field of a current carrying conductor and right hand thumb rule. Magnetic field of a solinoid and helix rule. Magnetic circuit, MMF, Flux, reluctance, magnetising force, magnetic saturation. Electromagnet and its polarity electron magnetic force, its magnitude and direction by fleming's left hand rule. Electromagnetic induction, dynamically induced e.m.f., fleming's right hand rule and lenz's

law. Self and mutually induced e.m.f. and self and mutual inductances. Concepts of single phase and three phase generation.

- 1.5 Electrical machines in printing: Basic construction, working, e.m.f. equation and concept of step up and step down transformer, operation of a transformer, tapped transformer, auto transformer, and voltage stabilisers. current, voltage and KVA rating of transformer,
- 1.6 Basic construction, working characteristics and applications of squirrel cage and Slip-ring type three phase induction motors and Capacitor type single phase induction motors, shaded pole motors and universal motors. speed control of single phase and three phase motors.
- 1.7 Main parts (contactor, push button stations, over load relay and time relay) of a starter with their purpose in the starter circuit. Circuit connection with motor and working of DOL, star-delta, auto transformer and motor resistance starters.
- 1.8 Electrical wiring and maintenance: Type of wiring, concept of wiring circuits and wiring, Introduction to main switch, D.B., switch board, wiring accessories, fuse and earthing. Wiring tools, testing of installation. I.E. Rules for wiring installations and Safety precautions.
- 1.9 Common faults, trouble shooting and prevenyive maintenance of wiring installation, electrical equipments and machines used in printing.
- 2. ELECTRONIC ENGINEERING:
- 2.1 Semi Conductor Devices:

P-type and N-type Semi conductors and P-N junction diode, Zener diode, BJT and JFET transistors. MOS device SCR and Photo devices.

2.2 Electronic Circuit Operations :

Rectification and half wave and full wave rectifiers, Zener voltage regulator, amplification, ocillation, modulation and detection progress and their purpose. Basic logic gates and basic flip flops.

2.3 Electronic In Printing:

Application of electronics in Press control, speed control, colour registration, web control, safety and measuring

devices.

LIST OF PRACTICALS

- 1. To Measure voltage at various currents in DC circuits to find resistance and also to verify Ohm's Law.
- 2. To Measure current, voltage and power in single phase AC circuit and to find power factor of the circuit.
- 3. To connect three phase load in star and also in delta and measure line and phase currents and voltages in each case.
- 4. To fix single phase energy meter, main switch/MCB and D.B. on a wooden board, to make their connections to supply a load and to take the observations of energy meter or energy consumption.
- 5. To do wiring of a lamp, a tube light, a fan and a five ampere socket controlled at one switch board.
- 6. To study DOL starter, to connect it with squirrel cage induction motor and to study its operations.
- 7. To connect star-delta starter with three phase induction motor, start and run the motor and also to reverse the direction of rotation.
- 8. To Study the operation of a tapped transformer, single phase and three phase auto-transformer for voltage control at load terminals and also study the operation of voltage stabilisers.

4.3 COMPUTER APPLICATION

Rationale:

Computers are being used for design and information processing in all branches of engineering. An exposure to fundamentals of computer programming is very essential for all diploma holders. this subject has been included to introduce students in the use and application of computers in engineering.

DETAILED CONTENTS

1. COMPONENTS OF THE COMPUTER:

Block diagram of computer, Types of monitors and other peripherals, Input and Output devices, Types of software, System software, Application software.

2. OPERATING SYSTEM:

- i. What is operating system, Multiprogramming, Time Sharing and Multi tasking.
- ii. Command of DOS, UNIX, LINUX, Windows environment menus of dialogue boxes, Concept of ICON, Function of Programming, Documnet

3. GRAPHICS:

MS Office, Page Maker, Coral Draw, Adobe Photoshop, Quark Express, Adobe Indesign

4. MS WORD PROCESSING:

File : Open, Close, Save and Find File, Print and Page

Setup

Edit : Cut, Copy, Find, Replace

Insert: Page Insert, Page No., Symbole

Font : Paragraph, Tabs, Boder & Shading, Change Case

Tools : Spelling, Mail Merge

Table : Insert Table, Delete Cells, Merge Cell, Sort Text

5. DATABASE:

Making datafile useing MS-ACCESS using various operation, Indexing, Generating, Reports, Printing Files and Other activity.

6. INTRODUCTION TO INTERNET:

What is Internet, How to send and receive E-Mail and see

71

Corrected and Approved By B.T.E. on Dated 04.05.2017

different types of web sides.

7. ROLE OF COMPUTER IN PRINTING:

Application at different stages such as type setting, Plate making, finishing process, H/w and S/w meant for printing industry

LIST OF PRACTICALS

- 1. Creating, Editing, Modifying database file, Label, Report, Format & Query.
- 2. Use All commonds of DOS.
- 3. Use & Practice all the features and utilities of MS Word and Practice on Hindi Key Fonts, Making Marriage Card, Bio Data, visting card, Letter Head setting, etc. .
- 4. Selection of command using Windows.
- 5. Practice on MS-ACCESS.
- 7. Graphics
 - A. Page Maker
 - B. Coral Draw
- 8. Practice on DOS/UNIX/LINUX/Windows.
- 9. Practices on E-Mail & Websites.
- 10. Practice of scanning of Photographs and Other things.

Rationale

Every printed product consists of text portion and illustrations, with the former occupying a predominent portion. Knowledge of text setting methods and equipment used for setting text, which is broadly termed 'Letter Assembly' is therefore very essential.

The aim of this subject is to study letter assembly as an important part of print production techniques, to enable the students to make judgement about the aspect of printing, particularly in relation to the requirements of designing the printed products.

This will cover development of typesetting method, preparation for typesetting, typesetting inputs and outputs, pageassembly, proofing, imposition and planning.

The aim is to further develop the students understanding and knowledge of letter assembly equipment, particularly in the areas of on line intergrated system, image generation system, editing and corrections, electronic page assembly, digital storage and outputs.

Detailed Contents

- 1. Brief Introduction To Typesetting Systems:
- 1.1 Introduction to Mechanical typesetting Merits & Limitations.
- 1.2 Phototype setting Systems Application, Merits & Limitations.
- 1.3 Digital type setting Systems Merits & Limitations.
- 2. Typographic Measurement System :
- 2.1 Units of Measurement, Point system, Units.
- 2.2 Computerized Measurement by different latest system.
- 3. Typesetting Routines.
- 3.1 Typesetting for commerical jobs ie books, magazines, newspapers and general etc.
- 3.2 Display setting.

- 3.3 Types of Proof and proof reading.
- 3.4 Editing, Correction and make-up for books, magazines, newspapers, general etc.
- 4. Digital type setting system :
- 4.1 Role & functions of computer in type setting.
- 4.2 Hardware, software its requirement for inputting and outputting.
- 4.3 Desk Top Publishing (DTP) System advantages & limitations
- 4.4 Various latest DTP software and their applicaiton.
- 4.5 Editing correcting and make-up, proffing.
- 4.6 Online and Offline system, RIP Station

LIST OF PRACTICAL

- 1. Hand Composition (15 marks):
- 1.1 Display work as per layout
- 1.2 Demonstration on Mechanical Typesetting Machines.
- 1.3 Make-up of pages.
- 1.4 Proof reading Different Techniques.
- 1.5 Proofing on Amoniya Paper with amoniya printing role.
- 2. Desk Top Publishing and Strike on System (35 marks):
- 2.1 Study of DTP Configuration.
- 2.2 Practice on DTP key board.
- 2.3 Setting text matters: Measure, Grid, Columns, Margins, Interlinear, Font selection on DTP system.
- 2.4 Corrections: on screen corrections.
- 2.5 Create: Title page, visting cards, letter head, envelop, invitation card, greeting card, bill/vouchers, banners and posters
- 2.6 Care & handling of D.T.P. system.

- 2.7 Setting of Daisy wheel and test matter on Electronic Typewriter.
- 2.8 Aguiring of data/image for digital printing.

- 4. N. Edward Nerg, Electronic Composition, A guide to the revolution in Type Setting, GATF, 1975
- 5. Joost List, Electronic Publishing, Vroom Helm, 1987.
- 6. Kirty Wilson_ Davies, Desk Top Publishing, Blue Print, 1987.
- 7. Desk Top Publishing, Book, Peter Worlock, 1988.
- 8. Desk Top Publishing By Ron Strutt and Kirty Wilson Devis.
- 9. Fundamentals of copy and Layout (Third Edition): National Text Book Company, Illinois, USA

4.5 PROCESS PLANNING AND FILM ASSEMBLY

Rationale

With the introduction of electronic and phototypesetting a bulk of text work is now printed by offset. Process planning & film Assembly Play a key role in Offset Printing Production. Introduction of Processes Planning and Film Assembly as an independent subject in the Diploma Curriculum is essential.

DETAILED CONTENT

- 1. Layout & Planning for Film Assembly :
- 1.1 Importance of planning and planning considerations.
- 1.2 Layout and planning information the layout factors- related to paper, machine, plate size, Plate Clamp allowance, paper grip allowance, arrangement of individual images of varying sizes, areas of critical register, ink distribution over the sheet.
- 1.3 Planning for rapid press makeready: Plate-cylinder guide marks standard distance, fitting the plate to the press, gripper and plate clamp allownance.
- 1.4 Preparing the layout :Sheet base and centre reference lines

- on the layout, placing the aids (register marks, colour quides, star-tergets, etc.,) within the layout; complicated layouts strait cut, die-cut and punched finishing and as per work specifications.
- 1.5 Planning imposing schemes: The imposition, imposition terms heads, food, fore-edges, backs, gutters, tails, folios, perfecting, imposing rules upright and oblong.
- 1.6 Methods of printing book-work: Sheet Work, work and turn, work and tumble, back marging allowance for sewing, saddle stitching, side stitching, perfect binding, etc., book-work margins.
- 1.7 Planning equipment, tools and materials.
- 1.8 Image quality control aids and devices.
- 2. Methods of Planning:
- 2.1 Direct ruling to the plate.
- 2.2 Considerations and methods of manila/ paper template with projected lines, metal keys, Golden rod Key, hinged printing down flats, Burn and red keys on film, adhesive and transfer systems.
- 3. Image Register Systems :
- 3.1 Register pins; punched- hole methods.
- 3.2 Page layout scheme including bleeds, trimns and folds.
- 3.3 Step & repeat.
- 4. Negative/ Postive film Assembly:
- 4.1 Inspection of films for assembly
- 4.2 Attching negatives to masking materials
- 4.3 Positive film assembly Opaquing and checking the flat.
- 4.4 Attaching tints on line negatives.
- 4.5 Film Assembly for multi colour printing.

LIST OF PRACTICALS

- 1. Film Assembly for Single- Colour Printing:
- 1.1 Preparation of Complimentary flats with negatives/ Positives

76

using pin- bar for: burring images, surprint reverse, Screen tints, Silhouting, halftones and drop out mask work.

- 1.2 Manual stepping of negatives/ Positive for plate exposure.
- 1.3 Method of duplicating film on daylight film.
- 2. Film Assembly for multi- Colour printing :
- 2.1 Preparation of flats with negatives/ Positives using register pin bar for flat colour work.
- 2.2 Multi colour film assembly using register pins.
- 2.3 Screen tints.

Refernece Books

- 1. Peck, H.L., Stripping: The Assembly of Film Images, Graphic Art Technical Foundation, U.S.A., 1989.
- 2. Gatehouse and Roper, film Assembly and Platemaking, Graphic Arts Technical Foundations U.S.A., 1982
- 3. Jorgensen and Field, Test Images for Printing, Grapic Arts Technical Foundation, U.S.A., 1989.

4.6 REPRODUCTION TECHNOLOGY

Rationale

Photomechanical transfer of images and electronic image generation are the areas of graphic reproduction in printing technology, A through Knowledge of reproduction photography is essential for the student to learn the process of Image carrier preparation for printing. The subject mainly deals with operation and handling of different equipment, machinery etc. for reproduction photography.

DETAILED CONTENT

- 1. Originals for Reproduction:
- 1.1 Require ments of original reproduction.
- 1.2 Classification of originals, their characteristics and suitability for reproduction.
- 1.3 Copy preparation for reproduction : Scaling, cropping.
- 2. Equipments and Accessories :
- 2.1 Process lens: Introduction, structure and requirements, care and handling. lens aperture, diaphragm-their functions.
- 2.2 Lateral reversal: Optical and straight line reversal.
- 2.3 Illuminants used for reproduction photography requirements kinds of modern illuminants- their merits and limitations. units of illumination, relative intensity and expouser calculations.
- 2.4 Process cameras: kinds of modern process cameras and accessories-their merits and limitations.
- 2.5 Darkroom accessories and their uses.
- 2.6 Halftone screen kinds and uses.
- 2.7 Light integrater, auto film/paper processor and their control devices.
- 3. Photographic Films and Processing Chemicals:
- 3.1 Structure of a photographic film, Ingredients used in photographic film manufacture, outline of film manufacture, kinds of photographic films used for reproduction photography— their characteristics and uses.

- 3.2 Characterstics curve and gama curve of photographic film and effect.
- 3.3 Latent Image Theory, reciprocity failure, intermittence effect.
- 3.4 Processing chemicals: developer, kinds, ingredients used in developers and their functions, stop bath, fixer, reducer and intensifiers.
- 4. Line Negative Making:
- 4.1 Basic line exposure, factorgoverning expouser.
- 4.2 Camera Procedures for line negative making from black & white colour lines originals.
- 4.3 Dark room procedures for processing an exposed film for line negative making; development and factors governing development; stop bath; fixing and after treatments.
- 4.4 Evaluation of line negatives.
- 4.5 Defects in line negative and their remedies.
- 5. Contact Photography:
- 5.1 Application of contact photography in reproduction.
- 5.2 Contact Photography: determining the correct exposure, hard and soft dots, Spreads and Chokes.
- 6. Halftone Reproduction :
- 6.1 Introduction to densitometry: Optical density and its measurement; use of densitometers, Colorimeter and Spectrophoto meter.
- 6.2 Screens: Cross line and contact screen; grey scale, Selection of screeing.
- 6.3 Theories of Halftone dot formation; screen distance.
- 6.4 Halftone negative making; requirements of Halftone negative for diffrent printing processes.
- 6.5 Halftone exposure systems; flash exposure.
- 6.6 Camera Procedures and dark room processing for Halftone negative making.

6.7 Evaluation of Halftone negatives; Halftone failure and remedies.

LIST OF PRACTICALS

- 1. Introduction to different equipments, study of different working parts, etc.
- 2. Preparation of precessing chemicals.
- 3. Making line negatives to different methods.
- 4. Line negatives from coloured line originals.
- 5. After treatments: reducers, intensifiers, chemicals reversal.
- 6. Halftone negative making. Calculation of screen distance, principle of dot formation Use of V ratio and inverse system
- 7. Use of gray scale. Contrast control by different methods Practice on different contacts.
- 8. Use of densitometers.
- 9. Study of density, range contrast, gama, characterstic curve.

Reference Books

- 1. Hentzel, Fred Ray Blair and Tom Destree, Graphic Arts Photography: Colour, GATF.
- 2. Eric Chambers, Manual of Graphic reproduction for Lithography, Litho Training Services Ltd., London and Manchester, 1979.
- 3. Ekald Fred Noemer, The Handbook of Modern Halftone Photography, Perfect Graphic Arts, Demarest.
- 4. James Walter Burden, Graphic Reportduction Photography, Focal Press, London, 1973.

- 6. Halftone Methods for the Graphic Arts, Graphics Materials Divison, Eastman Kodak, Co., N.Y.
- 7. William, P. Spence & David G. Requist, Graphic Reproduction, Benett Publishing, illinois Co., Raymond N.Blair the Lithographiers Manual, GATF.

- 8. Line Photography, AIFMP, New Delhi.
- 9. Halftone Photographic AIFMP, New Delhi.

4.7 IMAGE CARRIERS TECHNOLOGY-I

Rationale:

It is a technology subject. It gives the knowledge of different printing surface preparation, techniques like photo engraving, offset plates, gravure cylinders etc. With this information one can control the operation of the equipments / production of printing surfaces, etc.

Detailed Contents

- 1. Introduction:
- 1.1 Introduction to Image Carrier for different printing processes.
- 1.2 Details of Image Carrier for Flexo, gravure, offset, silk screen and digital process, its suitability and limitations.
- 2. Photo Engraving:
- 2.1 Metallic and non metallic image carrier for photoengraving.
- 2.2 Photo resists: Kinds, characteristics, requirements, dark and continuing reactions.
- 2.3 Photographic intermediates (Negative/ Positives): Kinds, characteristics, and requirements.
- 3. Electroplating For Gravure Cylinder Making Process
- 4. Off Set Plate Making:
- 4.1 Introduction to Offset plate processes. Materials for offset plates-merits, limitation and suitability.
- 4.2 Offset Platemaking, materials equipment and accessories.
- 4.3 Plate Grains, Graining and anodizing.
- 4.4 Introduction to various plate making process (surface, deepetch, wipe on, PS Plate, Paper Plate, etc.
- 4.5 Removal and addition work on plate.
- 4.6 Plate troubles and their remedies.
- 5. Introduction to CTP, Types of CTP and its working.

LIST OF PRACTICALS

1. Use of different photo resists for image forming on metal

- 2. Preparing relief plates line work
- 3. Preparing Deepetch plates (2 Nos.).
- 4. Preparing stereo plate.
- 5. Preparing Surface plate process (4 Nos.).
- 6. Preparing paper plates for table top offset machines.
- 7. Preparing Wipe on plate (2 Nos.)

REFERENCE BOOKS

- 1. GATEHOUSE & ROPER, FILM ASSEMBLEY & PLAT MAKING, GATF, USA.
- 2. OFFSET PLAT MAKING, GATF, USA.
- 3. MERTLE & OTHERS, PHOTOMECHANICS & PRINTING, VNR, USA.
- 4. KARCH & BUBER, GRAPHIC ARTS PROCEDURES, AMERICAN TECHNICAL SOCIETY, CHICAGO, USA.
- 5. OFFSET PLATE MAKING (DEEP-ETCH), AIFMP, NEW DELHI.
- 6. OFFSET PLATE MAKING (ALBUMIN PROCESS), AIFMP, NEW DELHI.
- 7. FORMULARY, AIFMP, NEW DELHI.

4.8 STUDENT CENTERED ACTIVITY

(See Annexure 2)

RATIONALE

The requirement of energy has increased manifolds in last two decades due to rapid urbanization and growth in industrial/service sector. It has become challenging task to meet ever increasing energy demands with limited conventional fuels and natural resources. Due to fast depletion of fossil fuels and a tremendous gap between supply and demand of energy, it is essential to adopt energy conservation techniques in almost every field like industries, commercial and residential sectors etc. Energy conservation has attained priority as it is regarded as additional energy resource. Energy saved is energy produced. This course covers the concepts of energy management and its conservation. It gives the insight to energy conservation opportunities in general industry and details out energy audit methodology and energy audit instruments.

DETAILED CONTENTS

1. Basics of Energy

- 1.1 Classification of energy- primary and secondary energy, commercial and non-commercial energy, non-renewable and renewable energy with special reference to solar energy, Capacity factor of solar and wind power generators.
- 1.2 Global fuel reserve
- 1.3 Energy scenario in India and state of U.P. Sector-wise energy consumption (domestic, industrial, agricultural and other sectors)
- 1.4 Impact of energy usage on climate

2. Energy Conservation and EC Act 2001

- 2.1 Introduction to energy management, energy conservation, energy efficiency and its need
- 2.2 Salient features of Energy Conservation Act 2001 & The Energy Conservation (Amendment) Act, 2010 and its importance. Prominent organizations at centre and state level responsible for its implementation.
- 2.3 Standards and Labeling
 - 2.3.1 Concept of star rating and its importance
 - 2.3.2 Types of product available for star rating

3. Electrical Supply System and Motors

- 3.1 Types of electrical supply system
- 3.2 Single line diagram
- 3.3 Losses in electrical power distribution system
- 3.4 Understanding Electricity Bill
 - 3.4.1 Transformers Tariff structure
 - 3.4.2 Components of power (kW, kVA and kVAR) and power factor, improvement of power factor

- 3.4.3 Concept of sanctioned load, maximum demand, contract demand and monthly minimum charges (MMC)
- 3.5 Transformers
 - 3.5.1 Introduction
 - 3.5.2 Losses in transformer
 - 3.5.3 Transformer Loading
 - 3.5.4 Tips for energy savings in transformers
- 3.6 Electric Motors
 - 3.6.1 Types of motors
 - 3.6.2 Losses in induction motors
 - 3.6.3 Features and characteristics of energy efficient motors
 - 3.6.4 Estimation of motor loading
 - 3.6.5 Variation in efficiency and power factor with loading
 - 3.6.6 Tips for energy savings in motors

4. Energy Efficiency in Electrical Utilities

- 4.1 Pumps
 - 4.1.1 Introduction to pump and its applications
 - 4.1.2 Efficient pumping system operation
 - 4.1.3 Energy efficiency in agriculture pumps
 - 4.1.4 Tips for energy saving in pumps
- 4.2 Compressed Air System
 - 4.2.1 Types of air compressor and its applications
 - 4.2.2 Leakage test
 - 4.2.3 Energy saving opportunities in compressors.
- 4.3 Energy Conservation in HVAC and Refrigeration System
 - 4.3.1 Introduction
 - 4.3.2 Concept of Energy Efficiency Ratio (EER)
 - 4.3.3 Energy saving opportunities in Heating, Ventilation and Air Conditioning (HVAC) and Refrigeration Systems.

5 Lighting and DG Systems

- 5.1 Lighting Systems
 - 5.1.1 Basic definitions- Lux, lumen and efficacy
 - 5.1.2 Types of different lamps and their features
 - 5.1.3 Energy efficient practices in lighting
- 5.2 DG Systems
 - 5.2.1 Introduction
 - 5.2.2 Energy efficiency opportunities in DG systems
 - 5.2.3 Loading estimation

6 Energy Efficiency in Thermal Utilities

6.1 Thermal Basics

- 6.1.1 Types of fuels
- 6.1.2 Thermal energy
- 6.1.3 Energy content in fuels
- 6.1.4 Energy Units and its conversions in terms of Metric Tonne of Oil Equivalent (MTOE)

6.2 Energy Conservation in boilers and furnaces

- 6.2.1 Introduction and types of boilers
- 6.2.2 Energy performance assessment of boilers
- 6.2.3 Concept of stoichiometric air and excess air for combustion
- 6.2.4 Energy conservation in boilers and furnaces
- 6.2.5 Do's and Don'ts for efficient use of boilers and furnaces

6.3 Cooling Towers

- 6.3.1 Basic concept of cooling towers
- 6.3.2 Tips for energy savings in cooling towers

6.4 Efficient Steam Utilization

7 Energy Conservation Building Code (ECBC)

- 7.1 ECBC and its salient features
- 7.2 Tips for energy savings in buildings
 - 7.2.1 New Buildings
 - 7.2.2 Existing Buildings

8 Waste Heat Recovery and Co-Generation

- 8.1 Concept, classification and benefits of waste heat recovery
- 8.2 Concept and types of co-generation system

9 General Energy Saving Tips

Energy saving tips in:

- 9.1 Lighting
- 9.2 Room Air Conditioner
- 9.3 Refrigerator
- 9.4 Water Heater
- 9.5 Computer
- 9.6 Fan, Heater, Blower and Washing Machine
- 9.7 Colour Television
- 9.8 Water Pump
- 9.9 Cooking
- 9.10 Transport

10 Energy Audit

- 10.1 Types and methodology
- 10.2 Energy audit instruments
- 10.3 Energy auditing reporting format

PRACTICAL EXERCISES

- 1. To conduct load survey and power consumption calculations of small building.
- 2. To check efficacy of different lamps by measuring power consumption and lumens using lux meter.
- 3. To measure energy efficiency ratio (EER) of an air conditioner.
- 4. To measure effect of valve throttling and variable frequency drive (VFD) on energy consumption by centrifugal pump.
- 5. To measure and calculate energy saving by arresting air leakages in compressor.
- 6. To measure the effect of blower speed on energy consumed by it.

PERSONALITY DEVELOPMENT

1 Introduction to Personality Development

AIM, Skills, Types of Skills, LIFE SKILLS VS OTHER SKILLS, Concept of Life Skills. Ten core Life Skills identified by WHO

2. Factors Influencing / Shaping Personality :

Introduction, Physical and Social Factors Influencing / Shaping

Personality (Hereditary, Self-Development, Environment, Education, Life-situations) Psychological AND Philosophical Factors Influencing / Shaping Personality (Past Experiences,

88

Dreams and Ambitions, Self-Image, Values)

3. Self Awareness - 1

DIMENSIONS OF SELF AWARENESS (Self Realization, Self Knowledge or Self Exploration, Self Confidence, Self Talk, Self

Motivation, Self Esteem, Self Image, Self Control, Self Purpose, Individuality and Uniqueness, Personality, Values, Attitude, Character), SELF REALIZATION AND SELF EXPLORATION THROUGH SWOT ANALYSIS AND JOHARI WINDOW,

4. Self Awareness - 2

SYMPATHY VS EMPATHY AND ALTRUISM,
Importance of Empathizing with Others,

5. Self Awareness - 3

Self-Awareness through Activity, Body Image (What is Body Image, What Decides our Body Image, What is Poor Body Image, What are the Harmful Effects of Poor Body Image), Tackling Poor Body Image(Enhance Self-Esteem, Build Up Critical Thinking, Build up Positive Qualities, Understand Cultural Variation, Dispel Myths, Utilize Life Skills)

6. Change Your Mind Set

What is Mindset, HOW TO CHANGE YOUR MINDSET (Get the Best Information Only, Make the best people your Role Model, Examine Your Current Beliefs, Shape Your Mindset with Vision and Goals, Find Your Voice, Protect Your Mindset, Let Go of Comparisons, Put An End To Perfectionism, Look At The Evidence, Redefine What Failure Means, Stop Worrying About What "People" Think)

INTERPERSONAL SKILLS

7. Interpersonal Relationship and Communication

INTERPERSONAL RELATIONSHIP, Forms of Interpersonal Relationship, Must Have in an Interpersonal Relationship, Interpersonal Relationship between a Man and a Woman (Passion, Intimacy, Commitment), Relationship Between Friends, ROLE OF COMMUNICATION IN INTERPERSONAL RELATIONSHIP (Take Care Of Your Tone And Pitch, Choice of Words is Important in Relationships, Interact Regularly, Be Polite, Try To Understand The Other Person's Point Of View As Well, Individuals Can Also Communicate Through Emails,

8. NON-VERBAL COMMUNICATION Communication Skills

Non-Verbal Communication,

We Communicate with Our Eyes, Communication with Facial Expression, A Good Gesture, Appearance, Posture and Gait, Proximity and Touch), IMPORTANCE OF LISTENING, Characteristics of Good and Effective Listener(Is Attentive,

Do

Not Assume, Listen for Feelings and Facts, Concentrate on the Other Speakers Kindly and Generously, Opportunities)

9. Communication Skills ACTIVITIES -

Activities in Making Collages, Making Advertisements, PPT Preparation $\ensuremath{\mathtt{\&}}$

Presentation, Speaking -Seminars, Group Discussions, Debates, Extempore Speeches, Listening to an audio clip and telling its

gist, Answering a telephone call, Making enquiries, General tips-

Pronunciation, Tone, Pitch, Pace, Volume, relevance, brief, simple Reading Newspaper, Magazines (Current Affairs, Economic magazines, Technical magazines), How to read a report, article, Writing-Resume Writing, Writing joining report,

Notice writing, Report making, Proposal writing, Advertisement,

Notice for tender, Minutes writing, E-Mail writing, Listening News, Listening to audio clips. (Lecture, poetry, speech, songs),

10. Body Language skills

Introduction, What is Body Language, Body Language Parts, Personal Space Distances (Intimate Distance, Personal Distance

Social Distance, Public Distance), IMPORTANT BODY LANGUAGE SIGNS AND THEIR MEANING

UNDERSTANDING OTHERS

11. Leadership Traits & Skills:

Introduction, Important Leadership Traits (Alertness, Bearing,

Courage, Decisiveness, Dependability, Endurance, Enthusiasm, Initiative, Integrity, Judgment, Justice, Knowledge, Loyalty, Sense

of Humour), Other Useful traits (Truthfulness, Esprit-decorps,

Unselfishness, Humility and sympathy, Tact without loss of moral

courage, Patience and a sense of urgency as appropriate, Selfconfidence,

Maturity, Mental including emotional stability)

12. Attitude

&

Types of Attitude, Components of Attitudes (Cognitive Component, Affective Component, Behavioral Component),
Types of Attitudes (Positive Attitude, Negative Attitude,
Neutral

Attitude, Rebellious Attitude, Rational and Irrational Attitudes,

Individual and Social Attitudes), Kinds of Attitude, ASSERTIVENESS, How to Develop Assertiveness (Experiment and Try New Things, Extend Your Social Circle, Learn to Make Decisions for Yourself, Indulge in Knowledge, Admire Yourself

Others), Negotiation (Be Sensitive to The Needs Others, Be Willing To Compromise, Develop Your Problem-Solving Skills, Learn to Welcome Conflict, Practice Patience, Increase Your Tolerance For Stress, Improve Your Listening Skills, Learn To Identify Bottom-Line Issues Quickly, Be Assertive, Not Aggressive)

PROBLEM SOLVING

OF

13. Analyzing & Solving a Problem skills

Critical Thinking, Creative Thinking, Decision Making, Goal Setting & Planning, Problem Solving

14. Time Management skills

Need of Time Management, TIME WASTERS (Telephone, Visitors , Paper work, Lack of Planning & Fire Fighting , Socializing , Indecision , TV , Procrastination), PRINCIPLES

TIME MANAGEMENT - Develop a Personal Sense of Time (Time Log , value of other people's time), Identify Long-Term Goals .

Concentrate on High Return Activities , Weekly & Daily Planning

(The Mechanics of Weekly Planning , Daily Planning), Make

Best Use of Your Best Time , Organize Office Work (Controlling

Interruptions , Organizing Paper Work), Manage Meetings, Delegate Effectively, Make Use of Committed Time, Manage Your Health,

15. Stress Management Skills

INTRODUCTION, Understanding Stress and its Impact, Expected Responses (Physical, Emotional, Behavioral), stress signals (thoughts, feelings, behaviors and physical), STRESS MANAGEMENT TECHNIQUES (Take Deep Breath, Talk It Out, Take A Break, Create a Quite Place in Your Mind, Pay Attention

to Physical Comfort, Move, Take Care of Your Body, Laugh, Mange Your Time, Know Your Limits, Do You Have To Be Right Always, Have A Good Cry, Look for the Good Things Around You, Talk Less, Listen More), UNDERSTANDING EMOTIONS AND FEELINGS-through Activity

16. Interview Skills (2 sessions from Industry Expert is Compulsory)

Curriculum Vitae (When Should a CV be Used, What Information Should a CV Include, personal profile, Covering Letter, What Makes a Good CV, How Long Should a CV Be, Tips on Presentation), Different Types of CV (Chronological, Skills-Based), BEFORE THE INTERVIEW, CONDUCTING YOURSELF DURING THE INTERVIEW, FOLLOWING THROUGH AFTER THE INTERVIEW, Interview Questions To Think About, MOCK INTERVIEW - Activity (MOCK INTERVIEW

EVALUATION - NON-VERBAL BEHAVIORS, VERBAL BEHAVIORS, General Etiquettes to face the Board , Telephonic interview

17. Conflict Motives -Resolution

Motives of Conflict (Competition for Limited Resources, The Generation Gap and Personality Clashes, Aggressive Personalities, Culturally Diverse Teams, Competing Work and Family Demands, Gender Based Harassment), Merits and Demerits of Conflict, Levels of Conflict (Interpersonal Conflict,

Role Conflict, Inter-group Conflict, Multi-Party Conflict, International Conflict), Methods of Conflict Resolution (The Win-

Lose Approach, The Lose-Lose Strategy, The Win-Win Approach), Techniques for Resolving Conflicts (Confrontation and Problem Solving Leading to Win-Win, Disarm the Opposition,

Cognitive Restructuring, Appeal to Third Party, The Grievance Procedure)

18. Negotiation / Influencing Skills

Why Influencing, What Is Influencing, TYPES OF INFLUENCING SKILLS (Probing And Listening, Building Rapport, Sign Posting,

Pacing, Selling, Assertiveness), LAWS AND PRINCIPLES OF INFLUENCE, The Six Laws of Influence (The Law of Scarcity, The Law of Reciprocity, The Law of Authority, The Law of Liking,

The Law of Social Proof, The Law of Commitment and Consistency), Influencing Principles (Making a Start, Buy Yourself

Thinking Time, Dealing With Disagreement, Difficult And Sensitive Situations)

19. Sociability: Etiquettes And Mannerism & Social Skills

Need for Etiquette, Types of Etiquettes (Social Etiquette, Bathroom Etiquette, Corporate Etiquette, Wedding Etiquette, Meeting Etiquette, Telephone Etiquette, Eating Etiquette, Business Etiquette, E-Mail Etiquettes,), MANNERISMS, HOW TO IMPROVE YOUR SOCIAL SKILLS (Be Yourself, Be Responsible, Be Open & Approachable, Be Attentive, Be Polite, Be Aware, Be Cautious)

20. Importance of Group / Cross Cultural Teams / Team Work skills Introduction, Types and Characteristics of

Groups (Definition of a

Group, Classification / Types of Groups, Friendship Group, Task

Group, Formal Groups, Informal Group, Effective Group), Importance of a Group, Characteristics of a Mature Group, TYPES AND CHARACTERISTICS OF A TEAM (Definition of a Team, Types of Teams, Functional Teams, Problem Solving Teams, Cross - Functional Teams, Self - Managed Teams),

Importance of a Team, Characteristics of a Team

21. VALUES / CODE OF ETHICS

Meaning, A FEW IMPORTANT VALUES (Honesty, Integrity, Purity, Discipline, Selflessness, Loyalty, Fairness, Equality, Trust,

Support, Respect, etc)

Note: One Orientation module for the faculty is must.

Involvement of Industry Experts is necessary for Interview Skills

5.2 BUSINESS MANAGEMENT

Rationale:

The existence of profit of a business is no more a chance phenomenon. It is a scientifically calculated management activity. Therefore, it is essential that in the curriculum for Diploma Course in Printing Technology the subject should be included as Basic subject. Supevisors are called Front line Managers in the sense that they are the persons directly in touch with the workers.

The study of management will enable the students to apply usefully the knowledge of industrial relations, legislations relating to industries printing and publication, management functions, personnel management and many other important and relevant activities in their professional lives.

DETAILED CONTENT

- 1. Introduction:
- 1.1 Economy and its effect on society.
- 1.2 Indian Economy under developed economy and Developing stage.
- 1.3 Status of Printing industry in India.
- 1.4 Production: Meaning and factors of production.
- 2. Business Organisation:
- 2.1 Forms of business organisation and their formation.
- 2.2 Propriety, Partnership, Private and public limited companies co-operatives and public sector.
- 3. Management:
- 3.1 Definition, difference with administration.
- 3.2 Histroy and growth of scientific management.
- 3.3 General management functions planning, organising, coordinating, motivating, directing and controlling.
- 3.4 Structure of an organisation- sales and marketing, prodution and administration, responsibilities.

- 3.5 Departmental management- management organisation and responsibilites, leadership delegation and authority.
- 3.6 Production organisation production planning and control system.
- 3.7 Factories organisation: Product Planning & control system
- 3.8 Factories Act & Industrial laws.
- 3.9 Salesmanship & advertising.
- 4. Productivity:
- 4.1 Principles of method study, principles of work measurement.
- 4.2 Principles of job evaluation.
- 4.3 Principles of time study, incentive payment scheme.
- 5. Personnel Management:
- 5.1 Elements of personnel management: industrial psychology behaviour and attitude.
- 5.2 Employment: job specification, selection, tests and interview, induction and training, general welfare amenities.
- 5.3 Handling grievances, ensuring uniformity of decision.
- 5.4 Discipline, correcting the workers, employee counselling, absenteism, labour turn over.
- 5.5 Joint consultation, works committee.
- 5.6 Trade Unionism.
- 6 Press Laws:
- 6.1 Copyright Act, Imprint & other laws.
- 6.2 Registration Act.

REFERENCE BOOKS

- 1. Aswathapa, K. Factory Organisation & Management, Himalaya Publishing House, Mumbai.
- 2. Shekher, S. A., Modern Business Organisation & Management, Himalaya Publishing House, Mumbai.

- 3. Shukla, M.C., Business Organisation & Management, S. Chand & Co., New Delhi.
- 4. Spriegal R. William, Industrial Management, S. Chand & Co., New Delhi.

5.3 PRINTING DESIGN-II

Rationale:

Every printed product is designed before it is printed. The print technician should have a clear perspective of the design principles involved in designing a printed product. The objective of this subject will be to introduce the study of design as a decision making discipline which controls all the aspects of the printing production.

DETAILED CONTENT

- 1. Planning for production:
- 1.1 Selection and Coordination of production processes within the economic terms and jobs specifications.
- 1.2 The possibilities and limitations of binding, finishing and ancilliary processees as they affect design.
- 1.3 Technical influences and the selection of the specification of ink, paper, cloth, and other materials in relation to job specifications and to different production processes decided.
- 2. Book Design:
- 2.1 Parts of a Book.
- 2.2 Format and page design to suit different classes of books, book jacket and binding styles.
- 2.3 Illustrations Their suitability, positions, captions and legends.
- 2.4 Casting off copy. Principles of copy fitting, copy fitting tables.
- 2.5 Margins: Importance of margins, determining margins to suit various styles of binding.
- 2.6 Preparation of page layouts for different parts of the book and dummies.
- 3. Display Design :
- 3.1 Principles of display. Factors affecting display setting.
- 3.2 The effective use of white space. The shape and the size of the space.

- 3.3 Type face combinations and their suitabilities.
- 3.4 Use of borders, rules and other decorative materials. Use of initials.
- 3.5 Grids: use of grid.
- 4. Newspaper Design.
- 4.1 Newspaper format; Parts of a newspaper.
- 4.2 Principles of newspaper design.
- 4.3 Treatment and arrangements of body matter and headings.
- 5. Magazine Design:
- 5.1 Parts of a magazine and their arrangements for Cover page, contents pages and sequences.
- 6. Design for Packaging:
- 6.1 Introduction to packaging, Kinds of printed packages, Introduction to Packages, designing economic importance, advantages, selling aspects.
- 7. Design Organisation:
- 7.1 Quality Control of art work.
- 7.2 Necessity of free lance artists, designers, and photographers.
- 7.3 The advertising agency: Its functions, procedures and services.
- 8. Degital Designing:

Software used in digital desiging of printed products

LIST OF PRACTICALS

- 1. Preparation of layouts and Dummies for the book.
- 2. Designing of leaflets, booklets, brochures.
- 3. Designing layout for sale display materials
- 4. Preparation of layout and paste ups for advertisement in newspapers and magazines.
- 5. Designing of newspaper pages.

98

- 6. Desinging of magazine pages.
- 7. Preparation of Dummies for the production of newspaper and magazine.
- 8. Designing for packaging
- 9. Copy preparation for text and illustrations.

Note :-

The students shall be required to produce at the time of internal and external examination a portfolio of specimens of prescribed practical work duly signed by him and verified by his teacher.

REFERENCE BOOKS

- 1. Walkar, Magazine Design, Blue print, London.
- 2. Marting Duglas, Books Design, Blue print, London.
- 3. Wakford, H. S. Design for Print Production, Focal Press, London.
- 4. Marguand, E. Graphic Design Presentation, VNR, USA.
- 5. Silver G., Graphic Layout & Design , VNR, USA.
- 6. HartBurt, A Publication Design: A guide to Pageout.
- 7. HartBurt, A Publication Design: A guide to Pageout Typography, Format & Style, VNR, USA.

Rationale

Every printed product consists of text portion and illustrations, with the former occupying a predominent portion. Knowledge of text setting methods and equipment used for setting text, which is broadly termed 'Letter Assembly' is therefore very essential.

The aim of this subject is to study letter assembly as an important part of print production techniques, to enable the students to make judgement about the aspect of printing, particularly in relation to the requirements of designing the printed products.

This will cover development of typesetting method, preparation for typesetting, typesetting inputs and outputs, pageassembly, proofing, imposition and planning.

The aim is to further develop the students understanding and knowledge of letter assembly equipment, particularly in the areas of on line intergrated system, image generation system, editing and corrections, electronic page assembly, digital storage and outputs.

DETAILED CONTENTS

- 1. Image Setting Systems:
- 1.1 Classification of image setting systems.
- 1.2 Suitability & limitations of different image setting systems.
- 1.3 Basic components of modern image setter and their functions
- 2. Image Setting Configuration:
- 2.1 Input devices work station, high end scanners, Digital Pen, FTP.
- 2.2 Software for text and image Setting- Type setting and page making, Illustration processing, Colour seperation and correction.
- 2.3 Output Devices- Image Setter, large formate inkjet printer, film processor.
- 2.4 Storage systems- Latest auto backup devices.

- 3. Digital Imaging:
- 3.1 Basics of image editing, page assembling and imposition.
- 3.2 Imposition and workflow software.
- 3.3 Raster image processor (RIP).
- 3.4 File extension for digital imaging e.g. TIFF, EPS, JPEG, Bitmap
- 4. Production Routine:
- 4.1 Steps in text processing.
- 4.2 Scanning Operations for illustration processing.
- 4.3 Output, Quality control.

LIST OF PRACTICALS

- 1. Setting of text, table and tabular setting on Desk Top Publishing system.
- 2 Setting of display matter.
- 3. Editing and correction of Desk Top Publishing system.
- 4. Page make-up of text matter by various word processing software.
- 5. Setting of text, table and tabular matter on various software.
- 6. Illustration editing and correction on various image editing software.
- 7. Output of practical performed.
- 8. Full sheet output and imposition through software.

- 10. Digital image-A Practical Guide by Adele Drobler, Greenberg and seth.

5.5 PLANNING AND COLOUR SEPERATION TECHNOLOGY

Rationale:

Photo-mechanical transfer of images and electronic image generation are the areas of graphic reproduction in printing technology, A through Knowledge of reproduction photography is essential for the student to learn the process of Image carrier preparation for printing. The course mainly deals with operation and handling of different equipment, machinery etc. for reproduction photography.

DETAILS CONTENTS

- 1. Light and Colour:
- 1.1 Electromagnetic waves, visual appreciation.
- 1.2 Properties of colour, colour perception.
- 1.3 Additive & subtractive principles of colour synthesis.
- 2. Equipments and Materials :
- 2.1 Camera essentials.
- 2.2 Filters, filter factor, filter ratio.
- 2.3 Halftone screen, special purpose, screens screen angles, AM Screening,.

FM Screening.

- 2.4 Piezography: Introduction and uses
- 2.5 Other modern printing techniques.
- 3. Quality Control Aids
- 3.1 Copy preparation and evaluation.
- 3.2 Tone and colour control.
- 3.3 Grey scale, register marks, register punch, Colour Patches.
- 4. Colour Separation:
- 4.1 Principles of colour reproduction.
- 4.2 Methods of colour separation: direct colour separation and indirect colour separation.
- 4.3 Exposure control system.
- 4.4 Evaluation of colour separations.

103

- 5. Colour Correction:
- 5.1 Basic principles of colour correction
- 5.2 Colour correction methods: manual colour correction, photographic colour correction, single overlay, two overlay, high light, premask, camera back masking, quality control mask, under colour removal.
- 6. Electronic Colour Scanner:
- 6.1 Principle of scanning, Principles of colour.
- 6.2 Electronic colour scanner: Working principle and functions of a colour scanner.
- 6.3 Electronic colour separation: scanner programming, scanner operation and evaluation of separations through scanner.
- 7. Miscellaneous Camera Techniques :
- 7.1 Duotone negative making.
- 7.2 Rescreening of halftone prints.
- 7.3 Preparation of halftone tints.
- 7.4 Line & halftone combination work.
- 7.5 Dropout negative-making.
- 8. Proofing:
- 8.1 After treatment of negative.
- 8.2 Prepress proofing, needs for prepress proofing.

LIST OF PRACTICALS

- 1. Rescreening from printing halftones.
- 2. Line and halftone Conbination negative making.
- 3. Screen tint preparation from contact screen.
- 4. Preparation of spreads and chokes for multicolour printing.
- 5. Manual retouching exercises.
- 6. Direct/Indirect separation from reflection copy.

104

Reference Books

- 1. Hentzel, Fred Ray Blair and Tom Destree, Graphic Arts Photography: Black and White, GATF, U.S.A.
- 2. Eric Chambers, Manual of Graphic reproduction for Lithography, Litho Training Services Ltd., London and Manchester, 1979.

- 6. William, P. Spence & David G. Requist, Graphic Reproduction, Benett Publishing, illinois Co., GATF.

5.6 IMAGE CARRIERS TECHNOLOGY-II

Rationale:

It is a technology subject. It gives the knowledge of different printing surface preparation, techniques like photo engraving, offset plates, gravure cylinders etc. With this information one can control the operation of the equipments and production of printing surfaces, etc.

DETAILS CONTENT

- 1. Relief Plate Making Processes:
- 1.1 Relief plates for letterpress, flexography and letterset , merits, limitations, suitability, materials, equipment and methods.
- 1.2 Precosting, Postcosting for elexography plated.
- 2. Offset Plate Processes:
- 2.1 P.S. Plate Process
- 2.2 Multi-metal plate process.
- 2.3 Photopolymer plates.
- 2.4 Paper Plate
- 2.5 Letterset Plates
- 2.6 Quality control aids; The Star Target, dot Gain scale, Senstivity guide, colour control bar, green bar, plate punching, Reflection Denistometer, Trouble Shooting.
- 3. C.T.P.: computer to Plate systems.
- 3.1 Types of CTP and Plate
- 3.2 Details working process of CTP.
- 4. Gravure Surface Preparation:
- 4.1 Conventional Processes of Gravure Cylinder preparation.
- 4.2 Electronic and laser beam engraving- Principles, equipment, materials and methods.
- 4.3 P.S. Photopolymer plates for gravure cylinders (Introductory).
- 5. Screen Preparation:

- 5.1 Screen fabrics: Kinds, Characteristics and suitability.
- 5.2 Screen preparation materials, accessories and methods.
- 5.3 Modern techniques of screen preparation.

 LIST OF PRACTICAL
- 1. Preparation of negative and positive working PS plates.
- 2. Preparation of photopolymer relief plates (Demonstration).
- 3. Flexographic Platemaking (Demonstration)
- 4. Gravure Cylinder making (Demonstration)
- 5. Electronic Engraving (Demonstration)
- 6. Polymer plates for Offset (Demonstration)
- 7. Preparation of image carrier for screen printing by different Prosses
- 8. Use of Pre-registration Devices.

REFERENCE BOOKS

- 1. GATEHOUSE & ROPER, FILM ASSEMBLEY & PLATE MAKING, GATF, USA.
- 2. OFFSET PLATE MAKING, GATF, USA.
- 3. MERTLE & OTHERS, PHOTOMECHANICS & PRINTING, VNR, USA.
- 4. KARCH & BUBER, GRAPHIC ARTS PROCEDURES, AMERICAN TECHNICAL SOCIETY, CHICAGO, USA.
- 5. MACHINE PRINTING, FOCAL PRESS, LONDON.

5.7 PRESS TECHNOLOGY-I

Rationale:

This is a technology subject. Technicians working in printing industry are required to deal with different printing machines of various processes. These machines have different operational units. The diploma holders are required to have a good knowledge of these machines. This subject deals with the printing machines of all the processes and their operational units.

Detailed Contents

- 1. Letter Press Printing Machine:
- 1.1 Letterpress cylinder Machines: Classification, relative merits and limitations, Mechanical and Operational features.

 Automatic feeding, inking and delivery systems.
- 1.2 Pre-make ready and Make-ready operations involving text matter, line and halftone blocks underlay, interlay & overlay.
- 1.3 Principle of Imposition Schemes upto 16 pages halfsheet work and sheet work.
- 1.4 Running defects: Analysis of causes and their remedies.
- 1.5 Introduction to Label Printing.
- 2. Floxgraphy Printing:
- 2.1 Types of image carriers, their suitability and uses.
- 2.2 Flexography printing machine, Types of machine.
- 2.3 Flexography printing mahcine operations and suitability.
- 2.4 Different types of inking system.
- 2.5 Types of ink and chamical used in flexography printing.
- 3. Digital Printing:
- 3.1 Introduction to digital printing, Toner based digital printing and Non toner based printing.
- 3.2 Digital Printing Fundamentals Pixel image, Digital image.CCD and CMOS. Introduction to various software used in digital printing.

- 3.3 Selection of technology for digital printing Variable data printing, print on demand, Different types of card printing (ATM, Credit Card, RFIF), MICR printing and various types of inkjet printing.
- 3.4 Brief introduction of 3D technology
- 3.5 Printing on different substrate i.e Glass, Plastics, gold printing, edge decoration, paper, plastic etc.
- 3.6 3D web technology, multimedia in multiple production.
- 3.7 Print on demand.
- 3.8 Hybrid printing technology.

LIST OF PRACTICALS

- 1. Introduction, handling, Make-ready and operation of letter-press machines.
- 2. Imposition scheme up to 16 pages Upright and oblong.
- 3. Colour printing and proofing of various jobs.
- 4. Practice of cutting, creasing, perforating, numbering, embossing and thermography
- 5. Colour mixing and matching.
- 6. Capturing images with digital camera.
- 7. Digitizing originals with high-end flatbed scanners.
- 8. Colour printing and proofing of job on digital printers.
- 9. Sample collection of various printing papers/substractes.
- 10. Sample collection of various printed materials
- 11. Demonstration of flexography printing.

REFERENCE BOOKS

- 1. Letter Press Printing I-II, C.S. Misra Anupam Prakashan Allahabad.
- 2. Akshar Mudran Shastra, C.S. Misra Anupam Prakashan, Allahabad.

- 9. Digital colour printing technology by Biswanath Charkaravarthy
- 10. Introduction to Prepress by Hugh M. Speirs.
- 11. Scanning Primer by Richard M. Adams II
- 12. Understanding Digital Colour by Phol Green

6.1 ENVIRONMENTAL EDUCATION & DISASTER MANAGEMENT

L T P 4 - -

RATIONALE:

A diplima student must have the knowledge of different types of pollution caused due to industrialisation and construction activities, so as he may help in balancing of eco-system and control pollution by providing controlling measures. They should be also aware of the environmental

laws

for effectively controlling the pollution of environment. The topics are to be taught in light of legislation Para-3.

TOPIC WISE DISTRIBUTION OF PERIODS:

SL.	NO. TOPIC	L T P	
1	Introduction	6	
2.	Pollution	4	
	Water Pollution	8	
2.2	Air Pollution	8	
2.3	Noise Pollution	4	
2.4	Radio Active Pollution	6	
2.5	Solid Waste Management	6	
3.	Legislations	4	
4.	Environmental Impact Assessment	4	
5.	Disaster Management	6	
	TOTAL	56 – –	_

DETAILED CONTENTS

1. INTRODUCTION:

- Basics of ecology, Ecosystem, Biodiversity Human activities and its effect on ecology and eco system, different development i.e. irrigration, urbanization, road development and other engineering activities and their effects on ecology and eco system, Mining and deforestation and their effects.
- Lowering of water level , Urbanization.
- Biodegradation and Biodegradibility, composting, bio remediation, Microbes .Use of biopesticidies and

111

biofungicides.

- Global warning concerns, Ozone layer depletion, Green house effect, Acid rain, etc.

2. POLLUTION:

Sources of pollution, natural and man made, their effects on living environments and related legislation.

2.1 WATER POLLUTION:

- Factors contributing water pollution and their effect.
- Domestic waste water and industrial waste water. Heavy metals, microbes and leaching metal.
- Physical, Chemical and Biological Characteristics of waste water.
- Indian Standards for qulity of drinking water.
- Indian Standards for quality of treated waste water.
- Treatment methods of effluent (domestic waste water and industrial/ mining waste water), its reuse/safe disposal.

2.2 AIR POLLUTION:

Definition of Air pollution, types of air pollutants i.e. SPM, NOX, SOX, GO, CO2, NH3, F, CL, causes and its effects on the environment.

- Monitoring and control of air pollutants, Control measures techniques. Introductory Idea of control equipment in industries i.e.
 - A. Settling chambers
 - B. Cyclones
 - C. Scrubbers (Dry and Wet)
 - D. Multi Clones
 - E. Electro Static Precipitations
 - F. Bog Fillers.
- Ambient air qulaity measurement and their standards.
- Process and domestic emission control
- Vehicular Pollution and Its control with special emphasis of Euro-I, Euro-II, Euro-III and Euro IV.

2.3 NOISE POLLUTION :

112

Sources of noise pollution, its effect and control.

2.4 RADISACTIVE POLLUTION:

Sources and its effect on human, animal, plant and material, means to control and preventive measures.

2.5 SOLID WASTE MANAGEMENT:

Municipal solid waste, Biomedical waste, Industrial and Hazardous waste, Plastic waste and its management.

3. LEGISLATION:

Preliminary knowledge of the following Acts and rules made thereunder-

- The Water (Prevention and Control of Pollution) Act 1974.
- The Air (Prevention and Control of Pollution) Act 1981.
- The Environmental Protection (Prevention and Control of Pollution) Act -1986. Rules notified under EP Act 1986 Viz.
 - # The Manufacture, Storage and Import of Hazardous Chemical (Amendment) Rules, 2000
 - # The Hazardous Wastes (Management and Handling)
 Amendment Rules, 2003.
 - # Bio-Medical Waste (Management and Handling) (Amendment) Rules, 2003.
 - # The Noise Pollution (Regulation and Control) (Amendment) Rules, 2002.
 - # Municipal Solid Wastes (Management and Handling) Rules, 2000.
 - # The Recycled Plastics Manufacture and Usage (Amendment) rules, 2003.

4. ENVIRONMENTAL IMPACT ASSESSMENT (EIA) :

- Basic concepts, objective and methodology of EIA.
- Objectives and requirement of Environmental Management System (ISO-14000) (An Introduction).

5. DISASTER MANAGEMENT:

Definition of disaster - Natural and Manmade, Type of disaster management, How disaster forms, Destructive power, Causes and Hazards, Case study of Tsunami Disaster, National policy- Its objective and main features, National Environment Policy, Need for central intervention, State Disaster Authority- Duties and powers, Case studies of various Disaster in the country, Meaning and benifit of vulnerability reduction, Factor promoting vulnerability reduction and mitigation, Emergency support function plan.

Main feature and function of National Disaster Management Frame Work, Disaster mitigation and prevention, Legal Policy Frame Work, Early warning system, Human Resource Development and Function, Information dissemination and communication.

6.2 PRESS TECHNOLOGY-II

Rationale:

This is a technology subject. Technicians working in printing industry are required to deal with different printing machines of various processes. These machines have different operational units. The diploma holders are required to have a good knowledge of these machines. This subject deals with the printing machines of all the processes and their operational units.

Detailed Contents

- 1. Offset Printing Machine:
- 1.1 Sheet Fed Offset mechines: Classification, purpose, Sizes; Speeds; suitability; Single, Two and multi colour and perfecting machines; mechanical and operational features, Different models used in modern industry.
- 1.2 Plate Cylinder, blanket cylinder, impression cylinder, packing of these Cylinders. Stretch during impression,
- 1.3 Registration systems: registration devices for book work single colour and multicolour printing; electronic register control.
- 1.4 Blanket and rollers: Structure and properties of blankets care and maintenance. Kinds of rollers their funtions, merits and limitations.
- 1.5 Pre-make ready and Make ready operation for printing of single colour, two colour and book jobs on sheet-fed offset machines.
- 1.6 Make ready operation for multi colour Printing, Colour sequence and its effects, Procedure and uses of Colour mixing and matching.
- 1.7 Web-fed offset printing machines, Mechanical and operational features, different types and their use in the printing industry.
- 1.8 Modern devices for Web Control, Multi Colour, Ink Control, Dampening systems, Heat set and Cold set inking system, Drying chamber, Silicou unit and Delivery attachment.
- 1.9 Automatic reel changing, modern controls of inking and dampening system.

- 1.10 U.V. ink printing.
- 2. Digital Printing:
- 2.1 Colour Management Introduction and image reproduction process.
- 2.2 Characterising input and output devices, use of CIELAB, CMS.
- 2.3 Digital printing processes Silver Faldire, Phernal, Inkjet, Electrostatic Process.
- 2.4 Market and Applications Introduction, defining "On Demand Printing", defining variable printing, Typical lenghts, Short-run process colour printing. On demand printing and publishing concepts.

LIST OF PRACTICALS

- 1. Adjusting automatic feeders.
- 2. Plate clamping, blanket fitting, preparing for run.
- 3. Preparation of fountain solution, dampening rollers.
- 4. Adjusting inking and dampening rollers, ink fountain setting.
- 5. Makeready and printing of text, line and halftone work in Single, Two, Three, and four colour.
- 6. Measurement of ink control strip through densitometer.
- 7. Make ready and practice on sheet fed and Web offset printing machines.
- 8. Preparing Digital Proofs with image reproduction process using colour management.

REFERENCE BOOKS

- 1. Technology of offset printing, C.S. Misra Anupam Prakashan Allahabad-India.
- 2. Durrant, W.R., Machine Printing, Focal Press, London.
- 3. Hutching, E.D., Printing By Letterpress, Heinemann, London.
- 4. Lithographers Manual, GATF, USA.
- 5. Offset Press Operating, GATF, USA.
- 6. Flexography; Principles & Practice, Flexographic Technical Association, USA.
- 7. Offset Mudran Shastra, C.S. Misra Anupam Prakashan, Allahabad.

116

- 8. Colour and its reproduction by Gray and Field.
- 9. Colour and Quality by heidelberg.
- 10. Pocket guide to colour with digital application by Thaomas E Schildgen, Frank Beah.
- 11. Computer to plate primer by Richard M Adams and Frank J Romano.
- 12. Electronic Colour Seperation by Dr. R. K. Molla.
- 13. The PDF Print Production Guide by Joseph Marin and Julie Sheffo.
- 14. On demand printing by Howord M. Fenten, Frank J. Romano.

6.3 BINDING & PACKAGING-II

Rationale:

This core subject deals with the special binding systems and automatic binding system. Advancements in binding process is taking place with great speed. A Diploma holder is required to supervise this section in a press. Therefore knowledge of this subject is very essential.

1. Banding & Laces:

Single, double, double string, russia, lacing.

2. Publishers Binding:

Folding, bundling, attaching plate and end papers gathering, sewing, nipping, spine gluing, trimming, spring back, edge decoration, rounding and backing, lining, Alternative forwarding techniques, board cutting and cloth cutting, case making, cover decoration, casing-in, pressing, inspection, dispatch.

3. Book Repairing Work:

Pulling a book, removing old groove, by trimming the book, applying the glue on loose leaf., over cast, strainthening out of vellum leaves, pressing.

4. Loose leaf binding and mechanical binding:

Interscrew, ring metal, prong metal, thong metal, record or universal metal, metal back ledger, metal spriral or coil, wiro, plastic comb.

5. Automation in bindery:

Folfing machine, bundling machine, gathering machine, wire stitching machine, thread stitching and looping machine, three- knife book trimmers, continuous trimmers, book back gluing machine. Rounding and backing machine, back-lining machine, lining up and head binding machine, case- making machine, automatic case making machine, back forming machine, casing in machine, pressing machine, Cold foil stamping machine, Automatic book finishing machine, types and suitability of machines for various classes of work.

6. "Embalishment:" UV coating, Aquaous coating, electron beam coating.

PACKAGING

- 7. Introduction and uses of packaging.
- 8. Principles of Packaging:

Concept of packaging, functions of packaging, packaging and productivity, package components export packaging.

9. Types of Packaging:

Paper based packaging materials, plastics in packaging, glass and metal containers in packaging, flexible packaging.

10. Packaging Techniques:

Packaging of accessories and spares - skin, blister and shrink packaging, stretch wrapping - strip packaging, blister packaging, pharma packaging.

11. Packaging Management:

Package design - an important marketing tool, systems approach to pakaging, scientific packaging and loss prevention.

11. Production Control:

Departmental planning and layout, modern producion techniques and work-flow sequence, prevention of deterioration: insects, fungi.

LIST OF PRACTICALS

- 1. Cutting machines: Understanding of various types of automatic cutters, automatic spacing, fixing and changing of knives, safety on cutters, maintenance and regular routine work in handling and care of machines.
- 2. Folding machines: Understanding of various types of automatic folders, knife folding and buckle folding, different folds, their names and purposes, adjustments, maintenance and regular routine work in handling and care of machines.
- 3. Introduction to binding machine: Tipping machine, Gathering automatic, Collating- automatic, Rounding and backing machines, Case making machine.
- 4. Sewing machine: different types, method of sewing, maintenance routine.

- 5. Adhesive binding: automatic machines, understanding of various types, perfect binder.
- 6. Mechanical and loose leaf binding machines used.
- 7. Printing and decorating cover-stamping with ink, with foil, blind.
- 8. Packaging design: Prepare the package on pulp board

Refernece Books

- 1. Martin, A.G., Finishing Process in Printing, Focal, 1972.
- 2. Johnson, A.W., Manual of Book Binding, Thames and Hudson.
- 3. Alex J. Vaughan, Modern Book binding
- 4. Learance Twon, Bookbinding by Hand.
- 5. Doeglas Cockerell, Bookbinding and the Care of Books.
- 6. Hanlon, J.F., Handbook of Packaging Engg. McGran Hill.
- 7. Pain, F.A., Fundamentals of Packaging, 1981.
- 8. Handbook of print media by Helmut Kippan Ed., Heidelberg. 6.4 PRINTING COSTING AND ESTIMATING

Rationale:

Costing and Estimating: Printing supervisors, owners of printing presses and so on, have to study costing for the purpose of cost recovery and cost control. The study of a scientific system of costing will give them proper guidance as to how the maximum utilization of the resources of the factory can be achieved and do away with waste of time and money.

In an extrenely competitive market, scientific estimating can guaranctee the meaningful survival of a printing organisation by enabling it to forecast correctly and judiciously the estimated cost of jobs, the overhead expenditure of a business, and the amount of profit to be made from each job.

DETAILED CONTENT

- 1. Costing:
- 1.1 Introduction the object of costing the factors likely to affect profitability, informations sought in costing, national expenses, the outline of British Federation system of costing.
- 1.2 A study of the budget classification of expenditure bases of allocation, apportionment and re-apportionment to cost centres, calculation of cost recovery rates, recovery of all

budgeted costs, assessment of capital values, forecasting the life of assests-methods of depreciation, cost sheet and estimate form.

- 2. Estimating
- 2.1 The importance of accurate estimating The tools of an estimator Output tabel
- 2.2 Calculations of of the printing substrate and flexible packaging materials.
- 2.3 Estimating for various method os image carrier preparation (conventional and latest printing processes)
- 2.4 Estimating of ink, Toner, Binding and Finishing materials.
- 2.5 Estimating for the warehouse.
- 2.6 Online estimating: Benifits, Types and processes.
- 2.7 Data base printing management system.

Reference Books

- 1. Cost Accountancy for printers, British Printing Industries Federation, Landon.
- 2. Estimating for Printers, British Printing Industries Federation, Landon.
- 3. Estimating Methods and cost analysis for printers, Balaraman and Krishnamurthy, Ramya Features, Chinnai.
- 4. Principles of applied costing for printing industry, K.S. Venkatraman, AIFMP, New Delhi.
- 5. Lagat Parikalan tatha Mulyankan, L.R. Nagpal, Neelam Prakashan, Chandigarh.
- 6. Mudran Samagri Prodyogiki, M.N. Lidbide, Madhaya Pradesh Hindi Granth, Academy Bhopal.
- 7. Costing and estimating for printers by B. D. Mendiratta.

6.5 BOOK DESIGN AND PRINTING PRODUCTION

Rationale:

This is diversified course. The objective of the course is to impart knowledge and skills in book production, an area of inter-disciplinary approach in printing technology.

DETAILED CONTENT

- 1. Selection of Book Format:
- 1.1 Standard and non standard formats: International ISO range, US/European Standard, metric book publishing format.
- 1.2 Making the right choice for book formate.
- 2. Preparation of Text:
- 2.1 Copy preparation, Presentation, copy editing, house style, defining the structure.
- 2.2 Designing the Text, Selection of type face, type area, page margins and text type size, heading styles, subsidiary text and illustration captions, Prelims and end matter.
- 3. Preparation of Illustration:
- 3.1 Line art work, tone illustration and the process of picture research, assessing originals for reproduction, line illustrations and tone illustrations.
- 3.2 Digital Image Eidting
- 4. Preparation of Cover and Jackets:
- 4.1 The cover/jacket brief; reviewing rough, drawing up and assessing finished art work-specifying the art work size presentation.
- 4.2 Bar codes-1 D and 2 D,QR Barcodes
- 5. Text Setting:
- 5.1 The type setting cycle: Steps in text processing, front end operations and page make-up techniques, output.
- 5.2 Marking proofs and controlling quality.
- 6. ORIGINATING AND PROCESSING THE ILLUSTRATIONS

122

- 6.1 Scanning of mono-colour and multi-colour illustrations.
- 6.2 Proofing and proof checking; Single colour integrated books, colour books.
- 7. PROOFING THE COVER/JACKET:
- 7.1 The originating stages.
- 7.2 Quality control.
- 8. PAPER AND INK:
- 8.1 Selection of paper for different types of books, paper measurement and calculation defects in paper.
- 8.3 Printing Inks: Specifying inks and process colour inks, calculation of ink consumption/milage.
- 9. BOOK PRINTING:
- 9.1 Sutability of selection of printing processes.
- 9.2 Selection of printing process: Letterpress, offset, Digital prepress and other processes.
- 9.2 Planning and plate making, selection of cover boards and jacket.
- 9.3 Total quality control management.
- 10. BINDING AND FINISHING PROCESS:
- 10.1 Different types of book binding.
- 10.2 Varnishing lamination, Foil stamping embossing, Trimming, UV coating spot lamination and spot UV.

LIST OF PRACTICALS

(4 Hours)

Study of industry working procedure- Every student require to submit their report in prescribe proforma.

- 7. BOOK PRODUCTION PRACTICE, PUBLISHERS ASSOCIATION/BRITISH PRINTING INDUSTRIES FEDERATION, LONDON.

The students of diploma in "Printing Technology" programme have to do a project work as part of curriculum and in partial fulfillment for the award of diploma by the state Board of Technical Education, Uttar Pradesh.

The objective of project work is to make use of the knowledge gained by the student at various stages of the diploma course and to enable the students to work in convenient groups on a project involving theoretical and experimental studies related to printing technology.

The project work is meant for solving or even indentifying open ended problems and to give remedial suggestions by applying the knowledge and skills gained through various subject areas. It is expected that students will be sent to various printing industries to take live problems from the field, as their project work.

Identification of printing industry and project activities should begin well in advance. Student should also be asked to identify suitable printing industry and project activities, which can be taken by them. One teacher as guide, will supervise and evaluate the project work of the students assigned under guidence.

This helps to judge the level of proficiency, originality and the capacity for application of the knowledge attained by the student, at the end of the course

Each student shall finally produce a comprehensive report, eovering background information, literature survey, problem statement, project work details and conclusions. This final report shall be in type written and bound form.

The following factors to be considered white selecting the projects -

- 1. The project has to be done by the students themselves and not by any outsider, that is, the diploma students with their own knowledge and skill shall be able to do the project
 - with somebody's guidence.
- 2. Repetition of same project done by any other batch of same year/ previous years shall not be permitted.
- 3. The total number of students in a group shall not exceed six.

R E S O U R C E S

An estimate of the requiremeth of resources, land buildings, equipment, furniture, staff, recurring and non recurring costs for establishing and running this course have been worked out in this chapter. These resources are the bare minimum and must be provided for this course.

1. DEPARTMENT AND LABORATORIES

The following Department and Laboratories for practical training have been identified for conducting Diploma course in Printing Technology.

- 1. Basic Engineering Department
- 2. Computer Application Laboratory
- 3. Printing Science Laboratory
- 4. Printing Design Studio Department
- 5. Text & Image Setting Department
- 6. Reproduction Technology Department
- 7. Image Carrier Technology Department
- 8. Printing Process Department
- 9. Press Technology Department (Including Letterpress, Flexography, Screen, Offset and intaglio workshop)
- 10. Digital Printing Department
- 11. Binding and Packaging Department.
- II STAFF

A. FACULTY

With the modernisation of curriculum and syllabus for Diploma Course, revision of faculty structure and updating of faculty qualification have become essential to make the faculty relevant to the curriculum.

The recommended faculty structure are given as under.

Staff requirement as per norms

Required for 150 Students

IV. EQUIPMENT

The details of experiment for the various laboratories and workshops are given in the APPENDIX $\ensuremath{\mathsf{I}}$

V. FURNITURE

The details of the furniture requirements may be worked out on the basis of students strength and number of laboratories and workshops. Every laboratory, classroom and drawing hall must have chalk board. Lump sum amount may be provided for this purpose.

VI ANNUAL RECURRING EXPENDITURE

- VI.1 In additional to staff salaries and allowances the provision for training cost, direct and indirect, may be made for the total number of student per year.
- VI.2 Library: there should be provision for purchase of books and journals for this discipline about Rs.- 12,000/ every year.

VII TOTAL COST ESTIMATES

There is difficulty in working out the details of costs for recurring and non - recurring items. The rough cost estimates are to be calculated as per requirment.

LIST OF EQUIPMENTS

Only those of the equipments given below which are essentially required for the conduction of practicals mentioned in the curriculum are to be procured by the institutions.

"Machine/Equipments/Instruments of old BTE list which are not included below are to be retained in the Lab/Shop for Demonstration purpose but not to be demanded fresh for purchase."

 ${\tt NOTE}$: Equipment for different shop and lab of latest verson should be purchased.

General Recommendations taken into consideration for deciding staff requirements and other facilities

- 1. In principle, duration of course will be three years with extra six months of practical Training in industry. In order to implement this Practical Training system efficiently, proper liaison staff should be provided by the State Government in the Institute. Diploma will be awarded to students after the completion of Practical Training. Till the above facilities are provided, the duration, of the course will remain as it is i.e., three years.
- 2. Many equipments required for setting laboratories and workshop for this course are very sophisticated and may have to be imported. Hence, efforts should be made for geting exemption from custom duty on such equuipment should be sought.
- 3. The purposeful implementation of the curriculum would necessiate arrangement of faculty development programmes so as to up-to-date the knowledge of the faculty.

STUDENT ACTIVITIES ON ENERGY CONSERVATION/ENERGY EFFICIENCY

- 1. Presentations of Case Studies
- 2. Debate competitions
- 3. Poster competitions
- 4. Industrial visits
- 5. Visual Aids

COURSE OUTCOMES

After studying this course, a student will be able to co-relate and apply fundamental key concepts of energy conservation and energy management in industry, commercial and residential areas. A student will be able to:

- Define principles and objectives of energy management and energy audit.
- Understand Energy Conservation Act 2001 and its features.
- Understand various forms & elements of energy.
- Identify electrical and thermal utilities. Understand their basic principle of operation and assess performance of various equipments.
- Identify areas of energy conservation and adopt conservation methods in various systems.
- Evaluate the techno economic feasibility of the energy conservation technique adopted.

INSTRUCTIONAL STRATEGY

Teachers are expected to lay considerable stress on understanding the basic concepts in energy conservation, principles and their applications. For this purpose, teachers are expected to give simple problems in the class room so as to develop necessary knowledge for comprehending the basic concepts and principles. As far as possible, the teaching of the subject must be supplemented by demonstrations and practical work in the laboratory. Visits to industries must be carried out. Expert from industry must be invited to deliver talks on energy conservation to students and faculty.

ANNEXURE- 2 STUDENT CENTER ACTIVITY

The purpose of this subject to enhance the skills of $% \left(1\right) =\left(1\right) +\left(1\right$

- 1. English proficiency
- 2. Level of academic knowledge
- 3. Presentation skills

To achive above goals, small group of students or individual students with similar needs work independently.
